*Transformations of Retailing in Europe after 1945* Lydia Langer,2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending But the implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

*Tradition and Innovation in English Retailing, 1700 to 1850* Ian Mitchell,2016-02-24 Three decades of research into retailing in England

from the seventeenth to nineteenth centuries has established a seemingly clear narrative fixed shops were widespread from an early date modern methods of retailing were common from at least the early eighteenth century shopping was a skilled activity throughout the period and consumers were increasingly part of and aware of being part of a polite and fashionable culture All of this is true but is it the only narrative Research has shown that markets were still important well into the nineteenth century and small scale producer retailers co existed with modern warehouses Many shops were not smart The development of modern retailing therefore was a fractured and fragmented process This book presents a reassessment of the standard view by challenging the usefulness of concepts like traditional and modern examining consumption and retailing as inextricably linked aspects of a single process and by using the idea of narrative to discuss the roles and perceptions of the various actors in this process such as retailers shoppers consumers local authorities and commentators The book is therefore structured around some of these competing narratives in order to provide a richer and more varied picture of consumption and retailing in provincial England Labour History in the Semi-periphery Leda Papastefanaki,Nikos

Potamianos,2020-11-23 This collective volume aims at studying a variety of labour history themes in Southern Europe and investigating the transformations of labour and labour relations that these areas underwent in the 19th and the 20th centuries The subjects studied include industrial labour relations in Southern Europe labour on the sea and in the shipyards of the Mediterranean small enterprises and small land ownership in relation to labour formal and informal labour the tendency towards independent work and the role of culture forms of labour management from paternalistic policies to the provision of welfare capitalism the importance of the institutional framework and the wider political context and women s labour and gender relations **The Oxford Handbook of Business History** Geoffrey Jones,Jonathan Zeitlin,2008-01-24 Introduction Approaches and debates Forms of business organization Functions of enterprise Enterprise and society

**Perceptions of Retailing in Early Modern England** Nancy Cox,Karin Dannehl,2017-05-15 Whilst there has been much recent scholarly work on retailing during the early modern period less is known about how people at the time perceived retailing both as onlookers artists and commentators and as participants Centred on the general theme of perceptions the authors address this gap in our knowledge by looking at a different aspect of consumption They focus on two ancillary themes the first is location and how contemporaries perceived the settlements in which there were shops the other is distance Pictures prints novels diaries and promotional literature of the tradespeople themselves provide much of the evidence Many of these sources are not new to historians but they have not been scrutinized and analysed with the questions in mind that are posed here The methodology to be employed has been developed by Nancy Cox over the last decade and is used successfully in her book *The Complete Tradesman* and in the compilation of the forthcoming *Dictionary of Traded Goods and Commodities 1550 1800* This book will find a ready market with scholars concerned with British social and economic history in the early modern period Although it is first and foremost a book written by historians for historians it nevertheless

borrows concepts and approaches from various disciplines concerned with theories of consumption material culture and representational art

**The Complete Tradesman** Nancy Cox, 2016-12-05 The Complete Tradesman redresses the relative paucity of studies on the history of retailing before 1800 Based upon extensive research into diverse trade sources Cox takes issue with the surprisingly resilient stereotype of the dull and out of date shopkeeper in the early modern period showing that the retailing sector was well adapted to the social and economic needs of the day and quick to exploit new opportunities Chapters cover not only distribution shop design customer relations and networks between tradesmen but also attitudes to retailing official controls and the response to novelty By throwing light on subjects hitherto overlooked and challenging existing whiggish preoccupations with progress towards modern retailing systems this study signals a new approach to the history of retailing The focus is placed on assessing how far tradesmen especially shopkeepers satisfied and stimulated contemporary desires for consumer goods

**The Politics of Provisions** Professor John Bohstedt,2013-06-28 The elemental power of food politics has not been fully appraised Food marketing and consumption were matters of politics as much as economics as England became a market society In times of dearth concatenations of food riots repression and relief created a maturing politics of provisions Over three centuries some eight hundred riots crackled in waves across England Crowds seized wagons attacked mills and granaries and lowered prices in marketplaces or farmyards Sometimes rioters parleyed with magistrates More often both acted out a well rehearsed political minuet that evolved from Tudor risings and state policies down to a complex culmination during the Napoleonic Wars Provision politics thus comprised both customary negotiations over scarcity and hunger and negotiations of the social vessel through the turbulence of dearth Occasionally troops killed rioters or judges condemned them to the gallows but increasingly riots prompted wealthy citizens to procure relief supplies In short food riots worked in a sense they were a first draft of the welfare state This pioneering analysis connects a generation of social protest studies spawned by E P Thompson s essay on the moral economy with new work on economic history and state formation The dynamics of provision politics that emerged during England s social economic and political transformations should furnish fruitful models for analyses of total war and famine as well as broader transitions elsewhere in world history

**Furniture-Makers and Consumers in England, 1754-1851** Akiko Shimbo,2016-04-15 Covering the period from the publication of Thomas Chippendale s The Gentleman and Cabinet Makers Director 1754 to the Great Exhibition 1851 this book analyses the relationships between producer retailers and consumers of furniture and interior design and explores what effect dialogues surrounding these transactions had on the standardisation of furniture production during this period This was an era before mass production when domestic furniture was made both to order and from standard patterns and negotiations between producers and consumers formed a crucial part of the design and production process This study narrows in on three main areas of this process the role of pattern books and their readers the construction of taste and style through negotiation and daily interactions through showrooms and other services to reveal the complexities of English material culture in a period of industrialisation

**Men and Menswear** Laura Ugolini,2017-03-02 Despite increasing academic interest in both the study of masculinity and the history of consumption there are still few published studies that bring together both concerns By investigating the changing nature of the retailing of menswear this book illuminates wider aspects of masculine identity as well as patterns of male consumption between the years 1880 and 1939 While previous historical studies of masculinity have focused overwhelmingly on the moral spiritual and physical characteristics associated with notions of manliness this book considers the relationship between men and activities which were widely considered to be at least potentially unmanly selling as well as buying clothes thus shedding new light on men s

lives and identities in this period
