Evolution Of Information Lineages In Gene Culture And Artifact:

The Evolution of Information Susantha Goonatilake,1991 This book is a contribution to a renewed worldwide interest in macro evolutionary perspectives Many writers over the last decade have made significant contributions to an emerging paradigm that provides common frameworks of evolution across several hitherto unconnected domains As the price of working in the Third World some of these contributions were unknown to the author till after the completion of a first draft of this manuscript

The Quest for a Unified Theory of Information Wolfgang Hofkirchner,1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

The Evolution of Cultural Entities Michael Wheeler,John M. Ziman,Margaret A. Boden,2002 Ever since Darwin scholars have noted that cultural entities such as languages laws and theories seem to evolve through variation selection and replication These essays consider whether this comparison is just a metaphor

Quest For A Unified Theory Wolfgang Hofkirchner,2013-10-15 First published in 1999 Volume 13 in the 13 volume set titled World Futures General Evolution Studies with a common focus of the emerging field of general evolutionary theory This volume will expand across disciplines where scholars from new fields will contribute books that propose general evolution theory in novel contexts The essays are structured with five topics Approaches to Unification Concepts of Information Self Organizing Systems Life and Consciousness Society and Technology

Mathematics of Bioinformatics Matthew He,Sergey Petoukhov,2011-03-16 Mathematics of Bioinformatics Theory Methods and Applications provides a comprehensive format for connecting and integrating information derived from mathematical methods and applying it to the understanding of biological sequences structures and networks Each chapter is divided into a number of sections based on the bioinformatics topics and related mathematical theory and methods Each topic of the section is comprised of the following three parts an introduction to the biological problems in bioinformatics a presentation of relevant topics of mathematical theory and methods to the bioinformatics problems introduced in the first part an integrative overview that draws the connections and interfaces between bioinformatics problems issues and mathematical theory methods applications

Global Transformations and World Futures - Volume I Sohail Tahir Inayatullah,2009-10-20 Global Transformations and World Futures is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Global Transformations and World Futures in two volumes deals with the diversity of points of view on this complex subject The chapters in these volumes are organized into three groups The first starts with chapters introducing the Global transformations in Knowledge Social and Cultural issues Issues such as the nature of global science the challenge of building real communities in a virtual world and the transition from an information economy to a communicative economy are explored The second presents the Global Economy The final group discusses the World Futures These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research

personnel and Policy analysts managers and decision makers and NGOs Metastasis and Metastability Kane X. Faucher, 2013-11-19 The word information carries a number of connotations depending on context and can be said to be one of the most problematic words to define despite many efforts by statistical theorists mathematicians physicists cyberneticians communication theorists computer scientists and philosophers Is information physical or non physical Is the universe digital analog or a chaotic mixture of the two This book explores a Deleuzian way of understanding information by retracing Deleuze's ontology of difference back to Gilbert Simondon's concepts of transduction metastability and perpetual individuation as a source for Deleuze's concept of the virtual Although Deleuze did not address information specifically in his oeuvre this book attempts to construct what a Deleuzian theory of information might look like as a consequence of his philosophical insights The reader is presented with a brief survey of information theories capsule explanations of the philosophy of Gilbert Simondon and Gilles Deleuze and a discussion on the roles of metastasis and metastability as a means of addressing the problematic known as information outside of computing regimes and as a critique of cybernetics informatics and memetics Can information be reconfigured as affirmative difference transformed into a nomad science or must it remain consigned to the realm of probabilism Globalization and Culture Jan Nederveen Pieterse, 2009-03-16 Now in a fully revised and updated edition this seminal text asks if there is cultural life after the clash of civilizations and global McDonaldization Internationally award winning author Jan Nederveen Pieterse argues that what is taking place is the formation of a global mélange a culture of hybridization From this perspective on globalization conflict may be mitigated and identity preserved albeit transformed The book offers a comprehensive treatment of hybridization through a series of innovative conceptual tables that are bolstered by textual analysis and compelling examples from around the world In a new chapter the author explores East West hybridities the idea that globalization is a process of braiding rather than simply a diffusion from developed to developing countries This historically deep and geographically wide approach to globalization is essential reading as we face the increasing spread of conflicts bred by cultural misunderstanding Memory and Technology Jason R. Finley, Farah Naaz, Francine W. Goh, 2018-11-12 How is technology changing the way people remember This book explores the interplay of memory stored in the brain internal memory and outside of the brain external memory providing a thorough interdisciplinary review of the current literature including relevant theoretical frameworks from across a variety of disciplines in the sciences arts and humanities It also presents the findings of a rich and novel empirical data set based on a comprehensive survey on the shifting interplay of internal and external memory in the 21st century Results reveal a growing symbiosis between the two forms of memory in our everyday lives The book presents a new theoretical framework for understanding the interplay of internal and external memory and their complementary strengths It concludes with a guide to important dimensions questions and methods for future research Memory and Technology will be of interest to researchers professors and students across the disciplines of psychology philosophy library and information science human

factors media and cultural studies anthropology and archaeology photography and cognitive rehabilitation as well as anyone interested in how technology is affecting human memory ____ This is a novel book with interesting and valuable data on an important meaningful topic as well as a gathering of multidisciplinary and interdisciplinary ideas The research is accurately represented and inclusive As a teaching tool I can envision graduate seminars in different disciplines drawing on the material as the basis for teaching and discussions Dr Linda A Henkel Fairfield University This book documents the achievements of a vibrant scientific project you feel the enthusiasm of the authors for their research The organization of the manuscript introduces the reader into a comparatively new field the same way as pioneering authors have approached it Prof Dr Wolfgang Sch nplflug Freie Universit t Berlin

New Consciousness for a New World Kingsley L. Dennis, 2011-08-16 A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things a new mind for a new world Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration Reveals how to participate in the process of conscious evolution to maintain resilience during these transitional times Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution For centuries indigenous wisdom traditions have talked of an epochal shift on the horizon of a spiritual renaissance for the earth and her living family Now the timelines are converging and the potential for an energetic upgrade for humanity is here but first we must survive and evolve through the current period of transition Explaining that evolution is not a gradual process but more like a shock to the system radical waves of transformation after a period of dormancy author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change Examining the nature of evolutionary cycles he explains that the instability we are now experiencing climate change economic meltdowns and increasing political polarization is the convergence of complex systems that have reached a critical state What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception a conscious evolution in recognition of the interconnectedness of all things a new mind for a new world Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls this book offers a glimpse of the new global society to come a renewed humanity for the 21st century and how each of us can best participate during the process of planetary transformation
