emerged in an attempt to solve the character recognition problem This book is written by very well known academics who have worked in the field for many years and have made significant and lasting contributions The book will no doubt be of value to students and practitioners Sargur N Srihari SUNY Distinguished Professor Department of Computer Science and Engineering and Director Center of Excellence for Document Analysis and Recognition CEDAR University at Buffalo The State University of New York The disciplines of optical character recognition and document image analysis have a history of more than forty years In the last decade the importance and popularity of these areas have grown enormously Surprisingly however the field is not well covered by any textbook This book has been written by prominent leaders in the field It includes all important topics in optical character recognition and document analysis and is written in a very coherent and comprehensive style This book satisfies an urgent need It is a volume the community has been awaiting for a long time and I can enthusiastically recommend it to everybody working in the area Horst Bunke Professor Institute of Computer Science and Applied Mathematics IAM University of Bern Switzerland In Character Recognition Systems the authors provide practitioners and students with the fundamental principles and state of the art computational methods of reading printed texts and handwritten materials The information presented is analogous to the stages of a computer recognition system helping readers master the theory and latest methodologies used in character recognition in a meaningful way This book covers Perspectives on the history applications and evolution of Optical Character Recognition OCR The most widely used pre processing techniques as well as methods for extracting character contours and skeletons Evaluating extracted features both structural and statistical Modern classification methods that are successful in character recognition including statistical methods Artificial Neural Networks ANN Support Vector Machines SVM structural methods and multi classifier methods An overview of word and string recognition methods and techniques Case studies that illustrate practical applications with descriptions of the methods and theories behind the experimental results Each chapter contains major steps and tricks to handle the tasks described at hand Researchers and graduate students in computer science and engineering will find this book useful for designing a concrete system in OCR technology while practitioners will rely on it as a valuable resource for the latest advances and modern technologies that aren't covered elsewhere in a single book **Global Approaches to**

Early Learning Research and Practice Kenneth R. Pugh, Peggy McCardle, Annie Stutzman, 2018-02-26 The health development and learning of many young children living in disadvantage areas are at serious risk Access to education has improved under the United Nations Millennium Development Goals and there are now programs in low and middle income countries that are aimed at improving instruction and learning The research and evaluation on the effectiveness of such programs show there are significant challenges but also some successes This issue features presentations of leading international scientists representatives from key governmental and non governmental organizations and others working with programs in the developing world and disadvantaged populations The presentations describe the goals existing challenges

and potential approaches to providing evidence based programs to young children in rural remote and poverty stricken areas Topics covered include the state of early childhood in low and middle income nations programs that have shown some success and innovative research approaches that have been often considered unfeasible in these contexts This is the 158th volume in this Jossey Bass series New Directions for Child and Adolescent Development Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area Each volume focuses on a specific new direction or research topic and is edited by experts from that field

The Origins and Character of the Ancient Chinese City Paul Wheatley,2017-07-12 These two volumes elucidate the manner in which there emerged on the North China plain hierarchically structured functionally specialized social institutions organized on a political and territorial basis during the second millennium b c They describe the way in which during subsequent centuries these institutes were diffused through much of the rest of North and Central China Author Paul Wheatley equates the emergence of the ceremonial center as evidenced in Shang China with a functional and developmental stage in urban genesis and substantiates his argument with comparative evidence from the Americas Mesopotamia Egypt Southeast Asia the Mediterranean and the Yoruba territories The Origins and Character of the Ancient Chinese City seeks in small measure to help redress the current imbalance between our knowledge of the contemporary Western style city on the one hand and of the urbanism characteristic of the traditional world on the other Those aspects of urban theory which have been derived predominantly from the investigation of Western urbanism are tested against rather than applied to ancient China The Origins and Character of the Ancient Chinese City examines the cosmological symbolism of the Chinese city constructed as a world unto itself It suggests with a wealth of argument and evidence that this cosmo magical role underpinned the functional unity of the city everywhere until new bases for urban life began to develop in the Hellenistic world Whereas the majority of previous investigations into the nature of the Chinese city have been undertaken from the standpoint of elites The Origins and Character of the Ancient Chinese City has adopted a point of view closer to that of the social scientist than the geographer

The Remaking of the Chinese Character and Identity in the 21st Century Wenshan Jia,2001-09-30 Wenshan Jia demonstrates that a true liberation of Chinese civic discourse can start with a focus on indigenous cultural practices such as

face practices the understanding that every human face offers a distinct cultural grammar for acting speaking and feeling Chinese character and identity the author argues are primarily functions of communication and as such these practices are of enormous consequence to the necessary reconstruction of Chinese identity in the changing socioeconomic context of the 21st century In this way Jia finds a middle ground between the advocacy of complete Westernization and radical Chinese nationalism as a pragmatic alternative communication is key Never before has facework research been approached so systematically from the standpoint of its relationship to character and identity Jia s work substantially advances the literature on Chinese communication and presents a unique perspective on its relationship to social transformation This new paradigm of facework including analytical methods such as Circular Questioning in addition to major case studies challenges traditional views while pointing the way toward a new and valuable social constructionist view
