Roman Artefacts and Society Ellen Swift, 2017-02-09 In this book Ellen Swift uses design theory previously neglected in Roman archaeology to investigate Roman artefacts in a new way making a significant contribution to both Roman social history and our understanding of the relationships that exist between artefacts and people Based on extensive data collection and the close study of artefacts from museum collections and archives the book examines the relationship between artefacts everyday behaviour and experience The concept of affordances features of an artefact that make possible and incline users towards particular uses for functional artefacts is an important one for the approach taken This concept is carefully evaluated by considering affordances in relation to other sources of evidence such as use wear archaeological context the end products resulting from artefact use and experimental reconstruction Artefact types explored in the case studies include locks and keys pens shears glass vessels dice boxes and finger rings using material mainly drawn from the north western Roman provinces with some material also from Roman Egypt The book then considers how we can use artefacts to understand particular aspects of Roman behaviour and experience including discrepant experiences according to factors such as age social position and left or right handedness which are fostered through artefact design The relationship between production and users of artefacts is also explored investigating what particular production methods make possible in terms of user experience and also examining production constraints that have unintended consequences for users The book examines topics such as the perceived agency of objects differences in social practice across the provinces cultural change and development in daily practice and the persistence of tradition and social convention It shows that design intentions everyday habits of use and the constraints of production processes each contribute to the reproduction and transformation of material culture
