Cunliffe, 1975      **Excavations at Portchester Castle** Barry Cunliffe, 1977-12 Situated at a strategic point on the south coast of England Portchester was an important defensive site from the Roman period onwards This volume reports on extensive excavations at the site in the 1960s and 1970s and describes Norman additions to the Roman defences a 12th Century Augustinian priory and a 16th century naval storehouse Includes small finds and pottery reports      **The Cambridge Companion to Historical Archaeology** Dan Hicks, Mary C. Beaudry, 2006-10-26 The Cambridge Companion to Historical Archaeology provides an overview of the international field of historical archaeology c AD 1500 to the present through seventeen specially commissioned essays from leading researchers in the field The volume explores key themes in historical archaeology including documentary archaeology the writing of historical archaeology colonialism capitalism industrial archaeology maritime archaeology cultural resource management and urban archaeology Three special sections explore the distinctive contributions of material culture studies landscape archaeology and the archaeology of buildings and the household Drawing on case studies from North America Europe Australasia Africa and around the world the volume captures the breadth and diversity of contemporary historical archaeology considers archaeology's relationship with history cultural anthropology and other periods of archaeological study and provides clear introductions to alternative conceptions of the field This book is essential reading for anyone studying or researching the material remains of the recent past

*Medieval Archaeology* Chris Gerrard, 2003-10-04 Chris Gerrard looks at the people and excavations that have been important in medieval archaeology and the core theory and methodology used creating an essential text for all medieval archaeologists      *British and Irish Archaeology*, 1994      **Henry VIII's Coastal Artillery Fort at Camber Castle, Rye, East Sussex** Martin Biddle, Jonathan Hiller, Ian Scott, 2014-02-15 Camber Castle is located on the south coast of England a short distance to the south of the town of and Cinque Port of Rye Largely constructed between 1539 and 1543 it was an elaborate artillery fortification that represented an important element of Henry VIII's Device or coastal defence network put in place from 1539 as a response to the threat of invasion following England's breach with Rome The castle was operational for 100 years By the 1630s the steady advance of the coastline had left it stranded well inland from the sea This combined with changes in the concept of artillery fortification resulted in its decommissioning in 1637 Unusually Camber Castle was not adapted for continued use through the 18th and 19th centuries and survives as an example of a largely unmodified Henrician artillery fort It displays several clear and discrete phases of construction which reflect changes in thinking about the design of fortifications The construction phase of 1539-40 under the direction of Stephen von Haschenperg is of particular interest since it represents the first attempt to build in England an artillery fortress of ultimately Italian inspiration Doubts about the effectiveness of von Haschenperg's design led however to a complete remodelling of the castle's defences

along more conservative lines undertaken in 1542 3 The castle which is in the guardianship of English Heritage has seen numerous campaigns of research survey and excavation This volume draws together all the available evidence to provide a full and synthesised account of the current state of knowledge regarding this monument It includes a revised and expanded version of Martin Biddle's authoritative study originally published in *The History of the King's Works* Full reports are also included on the artefact and animal bone assemblages which are of considerable importance for the early post medieval period These include the extensive 16th and early 17 century assemblage of English and imported pottery a German ceramic tile stove a wide range of 16th and 17th century military artefacts and a significant collection of vessel glass including facon de Venise cristallo The animal bone collection is a useful benchmark for the zoo archaeology of post medieval England and provides evidence for early livestock improvements There is also a detailed review of the surviving building account for von Haschenperg's fortifications

**Medieval Warhorse** Oliver H. Creighton, Robert Liddiard, Alan K. Outram, Carly Ameen, Kate Kanne, 2025-02-24 The image of the armoured knight mounted on his charging warhorse is one of the most evocative of the Middle Ages As distinctive symbols of social status horses were central to the medieval aristocratic image and closely bound up with concepts of knighthood and chivalry while as weapons of war bred for size strength and stamina they changed the face of battle Drawing upon new interdisciplinary research this volume presents a fresh perspective on warhorses and medieval horses generally in Britain understood within its wider European context It adopts an integrated approach that covers the full array of evidence for medieval horses from their physical remains bones teeth and DNA equipment and armour through to visual sources such as sculpture and wall paintings and documentary and landscape evidence for the environments in which they were bred and trained Analyses of these sources of information are first presented individually and then integrated and cross compared with the historical record to present a new chronology of horse stature conformation and appearance and to generate new understandings of the changing place of the horse in the medieval world

**Ritual, Belief and the Dead in Early Modern Britain and Ireland** Sarah Tarlow, 2010-11-22 Drawing on archaeological historical theological scientific and folkloric sources Sarah Tarlow's interdisciplinary study examines belief as it relates to the dead body in early modern Britain and Ireland From the theological discussion of bodily resurrection to the folkloric use of body parts as remedies and from the judicial punishment of the corpse to the ceremonial

interment of the social elite this book discusses how seemingly incompatible beliefs about the dead body existed in parallel through this tumultuous period This study which is the first to incorporate archaeological evidence of early modern death and burial from across Britain and Ireland addresses new questions about the materiality of death what the dead body means and how its physical substance could be attributed with sentience and even agency It provides a sophisticated original interpretive framework for the growing quantities of archaeological and historical evidence about mortuary beliefs and practices in early modernity
