

PREFACE

ALTHOUGH acknowledgments have been given in the introductory paper to the names of men whose papers on the state of *Alvar de Sacrificio* (Wilcox and Smith 1961), I would like to mention again, and thank, them who contributed to accumulating the information that made possible this final report on the excavation carried on at the site.

The map of the site, which was of utmost importance to the excavation and architectural investigation of *Alvar de Sacrificio*, was prepared by W. R. Bullard. This was by no means an easy undertaking due to the very dense natural growth which covered parts of the area to be mapped.

The major part of the excavation carried on at *Alvar de Sacrificio* was under the supervision of graduate students on the staff of the project. It is from their careful and accurate recording, as well as from written reports on the results of their work, that most of the following description and discussion of the excavations at *Alvar de Sacrificio*, including the architecture, settlement, burial, and other, has been taken. I wish to thank them all for their important contribution.

During the 1961 field season, Jack Wilson carried on preliminary work in Structures A-1 and Michael P. Hoffman on exploratory excavations in the northeast corner of Structure A-III and in Mound 1, where he uncovered a large number of burials. In 1962, Timothy Fiske continued the work started in Structure A-1, greatly increasing our knowledge of that building. The following season Fiske finished what excavation was to be done on Structure A-1 and put exploratory trenches into Structures A-III. As a result of his work, a great deal was learned about the history of these two buildings and plans were made for further excavations. During this same field season, 1963, Sarah A. C. Keller uncovered the north end of Structure A-III and David Hally started the investigation of "house mounds" and began the excavation of Structure B-III. The

house mound survey, although not successful as far as contributing information about the plans of dwellings, was most important in establishing the *Alvar de Sacrificio* ceramic sequence and in providing some knowledge of settlement patterns. In 1964, John Ladd with the help of Juan Luis Felipe began the house mound survey. The section on settlement in the following paper is based on Hally's and Ladd's reports on their findings. During the 1964 field season Ladd also excavated Structures B-IV and finished the work on Structure B-III started in 1963. The results of the investigation of these two buildings helped immeasurably in the understanding of the development of Group B plans and its surrounding buildings, the earliest extant ones at the site.

I also wish to thank Richard E. M. Adams, in charge of the study of ceramics at *Alvar de Sacrificio*. The results of his work made it possible to place in their proper sequence the various architectural periods at the site as well as to give a clear picture of the changes in the sequence through time.

To John A. Graham I owe a great deal not only for his work on the inscriptions, which was a great help in dating the architectural sequence and periods, but also for his companionship during the first season, 1961, at *Alvar de Sacrificio*. It was a miserable rainy season. For the first two and a half months, before the permanent camp was built, we slept under thick shelter as rain, protected from mosquitoes and other pests by "patiothion" or mosquito nets. We were the only staff members present during most of the season and it was a great comfort to have a companion who was cheerful, uncompromising, and cooperative.

I also wish to thank Frank Reid, who did a laboratory study of the human skeletal remains from *Alvar de Sacrificio*, for his cooperation in supplying me with the age and sex of some skeletal skeletons as well as information about artificial skull deformation, which was necessary for the section on burials.

Quirigua, Guatemala Wendy Ashmore, 2013-01-09 This monograph reports the results of the Quirigu Project Site Periphery Program five seasons 1975 1979 of archaeological survey and excavation in the 96 km² immediately adjoining the classic Maya site of Quirigua Ashmore identifies and helps us understand where and how the people of Quirigua lived She presents detailed material evidence in two data catalogues for the floodplain settlement adjoining Quirigua and for sites in the wider periphery The work situates Quirigua settlement firmly in a regional context benefiting from the extraordinary abundance of information amassed in southeastern Mesoamerica since 1979 It sheds new light on the political economic and social dynamics of the region including the sometimes fractious interactions between Quirigua its overlords at Copan and people elsewhere in the Lower Motagua Valley and beyond Quirigua Reports IV *Archaeological Investigations of the Northern Maya Highlands, Guatemala* Robert James Sharer, David W. Sedat, 1987-01-29 Final report of the 1970 1974 research conducted in the Salama Valley Baja Verapaz and adjacent areas of the highlands of Guatemala The volume presents the results of the first comprehensive study of northern highland preclassic occupation and cultural development in light of the question of highland lowland interaction and its role in the growth of Maya civilization **Archaeology of Ancient Mexico**

excavations the chapters in this volume provide current comprehensive area by area summaries of the region's Precolumbian past. Research in the last two decades has indicated that the evolution and adaptations of the indigenous cultures of the region parallel those found elsewhere in Mesoamerica from the simple Formative groups to the complex states of the North. The topics discussed in the book are local and cultural syntheses and specific problems such as chronology, social organization and economic systems present much new information crucial to the understanding of cultural variations in Mesoamerica.

The Ancient Maya Heather McKillop, 2004-08-19 Thanks to powerful innovations in archaeology and other types of historical research we now have a picture of everyday life in the Mayan empire that turns the long accepted conventional wisdom on its head. Ranging from the end of the Ice Age to the flourishing of Mayan culture in the first millennium to the Spanish conquest in the 16th century *The Ancient Maya* takes a fresh look at a culture that has long held the public's imagination. Originally thought to be peaceful and spiritual the Mayans are now also known to have been worldly, bureaucratic and violent. Debates and unanswered questions linger. Mayan expert Heather McKillop shows our current understanding of the Maya explaining how interpretations of dirt archaeology, hieroglyphic inscriptions and pictorial pottery are used to reconstruct the lives of royalty, artisans, priests and common folk. She also describes the innovative focus on the interplay of the people with their environments that has helped further unravel the mystery of the Mayans' rise and fall.

Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya Debra S. Walker, 2023-04-15 *Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya* summarizes archaeological researchers' current views on the adoption and first use of pottery across the Maya lowlands. Covering the early Middle Preclassic period when communities began using and producing pottery for the first time roughly 1000-600 BC through to the establishment of a recognizably Maya tradition termed the Mamom ceramic sphere about 600-300 BC, the book demonstrates that the adoption was broadly contemporary with variation in how the new technology was adapted locally. Analyzing ceramics found at sites in Belize, Peten, Guatemala and Mexico, the contributors provide evidence that the pre-Mamom expansion of pottery resulted from increased dependence on maize agriculture, exploitation of limestone caprock and greater reliance on a preexisting system of long distance exchange. The chapters describe the individual experiences of new potting communities at various sites across the region. They are supplemented by appendixes presenting key chronological data as well as the principal types and varieties of pre-Mamom ceramic complexes across the various spheres. Xel Eb Swasey Cunil and Ek A significant amount of new material has been excavated in the last decade, changing what is known about the early Middle Preclassic period and making *Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya* a first read of the early ceramic prehistory of the Maya lowlands. It will be a valuable resource for students and scholars interested in the archaeology of the Maya lowlands, Mesoamerican social complexity and ceramic technology. Contributors: E. Scarborough, David R. Wilcox, 1993-01-01 The Precolumbian ballgame played on a masonry court has long intrigued scholars because of the magnificence of its archaeological remains From its lowland Maya origins it spread throughout the Aztec empire where the game was so popular that sixteen thousand rubber balls were imported annually into Tenochtitlan It endured for two thousand years spreading as far as to what is now southern Arizona This new collection of essays brings together research from field archaeology mythology and Maya hieroglyphic studies to illuminate this important yet puzzling aspect of Native American culture The authors demonstrate that the game was more than a spectator sport serving social political mythological and cosmological functions it celebrated both fertility and the afterlife war and peace and became an evolving institution functioning in part to resolve conflict within and between groups The contributors provide complete coverage of the archaeological sociopolitical iconographic and ideological aspects of the game and offer new information on the distribution of ballcourts new interpretations of mural art and newly perceived relations of the game with material in the Popol Vuh With its scholarly attention to a subject that will fascinate even general readers The Mesoamerican Ballgame is a major contribution to the study of the mental life and outlook of New World peoples **The Ruins of Altar de Sacrificios, Department of Petén, Guatemala** Gordon Randolph Willey, Augustus Ledyard Smith, 1969 **Social Patterns in Pre-classic Mesoamerica** David C. Grove, 1999 This volume is both a summation of work that has been carried out over a long period of time and a signpost pointing the way for future studies Issues regarding gender social identity and landscape archaeology are present as are the analysis of mortuary practices questions of social hierarchy and conjunctive studies of art and society that are in the best tradition of scholarship at Dumbarton Oaks Ancient Maya Commoners Jon C. Lohse, Fred Valdez, Jr., 2010-01-01 Much of what we currently know about the ancient Maya concerns the activities of the elites who ruled the societies and left records of their deeds carved on the monumental buildings and sculptures that remain as silent testimony to their power and status But what do we know of the common folk who labored to build the temple complexes and palaces and grew the food that fed all of Maya society This pathfinding book marshals a wide array of archaeological ethnohistorical and ethnographic evidence to offer the fullest understanding to date of the lifeways of ancient Maya commoners Senior and emerging scholars contribute case studies that examine such aspects of commoner life as settlement patterns household organization and subsistence practices Their reports cover most of the Maya area and the entire time span from Preclassic to Postclassic This broad range of data helps resolve Maya commoners from a faceless mass into individual actors who successfully adapted to their social environment and who also held primary responsibility for producing the food and many other goods on which the whole Maya society

depended **Ancient Maya Women** Traci Ardren, 2002 The flood of archaeological work in Maya lands has revolutionized our understanding of gender in ancient Maya society The dozen contributors to this volume use a wide range of methodological strategies archaeology bioarchaeology iconography ethnohistory epigraphy ethnography to tease out the details of the lives actions and identities of women of Mesoamerica The chapters most based upon recent fieldwork in Central America examine the role of women in Maya society their place in the political hierarchy and lineage structures the gendered division of labor and the discrepancy between idealized Mayan womanhood and the daily reality among other topics In each case the complexities and nuances of gender relations is highlighted and the limitations of our knowledge acknowledged These pieces represent an important advance in the understanding of Maya socioeconomic political and cultural life and the archaeology of gender and will be of great interest to scholars and students **Materializing Ritual Practices** Lisa M.
