Halverson, Kristie A. Foell, 2013-02-18 The sudden fall of the Berlin Wall is one of the defining images of the late twentieth century The subsequent unification of Germany and the decision to return Berlin to its status as capital has made the constant changes within the city a matter of public interest It also offered Berlin the opportunity to create a new image for itself one that can serve as a counterbalance to the politically charged recent history of Berlin as the capital of Nazi Germany and former East Berlin as the capital of the German Democratic Republic Poised between capitalist Western Europe and the former communist powers in Eastern Europe Berlin occupies a fascinating geopolitical space This anthology presents a unique glimpse into the various constituencies that make up Berlin and that impact the city s challenges and promises *Ein Stück Grossstadt als Experiment* Vittorio Magnago Lampugnani, Romana Schneider, 1994 *Building the State: Architecture, Politics, and State Formation in Postwar Central Europe* Virag Molnar, 2013-10-08 The built environment of former socialist countries is often deemed uniform and drab an apt reflection of a repressive regime Building the State peeks behind the grey fa ade to reveal a colourful struggle over competing meanings of the nation Europe modernity and the past in a divided continent Examining how social change is closely intertwined with transformations of the built environment this volume focuses on the relationship between architecture and state politics in postwar Central Europe using examples from Hungary and Germany Built around four case studies the book traces how architecture was politically mobilized in the service of social change first in socialist modernization programs and then in the postsocialist transition Building the State does not only offer a comprehensive survey of the diverse political uses of architecture in postwar Central Europe but is the first book to explore how transformations of the built environment can offer a lens into broader processes
