many cases by their opacity. Traditionally the work on phraseology has placed the emphasis on the total fixing of components and structures of verbal expressions. Variation in PUs is currently an uncontested fact and has been extensively studied and analyzed. In addition, in the case of languages like Spanish, English, French spoken in many countries, new creations or diatopic variants arise. While these diatopic expressions have been collected or analyzed in their territory of influence, no comprehensive collection showing all the expressions and contrastive analysis to observe the similarities and differences between these diatopic creations with all their idiosyncratic and cultural references have been made so far. The content of this volume deals with numerous linguistic, lexicographic and translational problems in the context of language variation in general as well as specifically related to diatopic variation. The aim is to make progress in these challenging and highly interesting areas which still pose many comprehension and translation problems.

En los capítulos iniciales se presenta el AC como una disciplina y método analítico para el estudio del habla y otras formas de conducta humana en la interacción social; se hace un breve recuento histórico del desarrollo de la perspectiva analítica conversacional y se introduce a los lectores al sistema de transcripción usado en el AC. Los capítulos siguientes están dedicados a explorar cuatro dominios claves en la organización de la conversación espontánea: la toma de turnos, las secuencias de acciones, la preferencia y la enmienda, destacando la importancia de prácticas del diseño de turno en cada dominio. Seguidamente se discute la conexión entre organizaciones y prácticas del habla en interacción y contextos sociales e identidades de los participantes en conversación.
