Subcommittee on Oversight and Investigations,1996 Federal Lands U S Government Accountability Office (G,U. S. Government Accountability Office (,2013-06 Pursuant to a congressional request GAO reviewed the management of federally owned lands from June 3 1964 through September 30 1993 focusing on the changes in the amount of federally owned land 1 managed by the four major federal land management agencies and 2 encumbered for conservation purposes by legislative or administrative restrictions GAO found that 1 the overall amount of federal land managed by the four agencies decreased from about 701 million acres to about 623 million acres during the 29 year period 2 almost all of the decrease in federal lands was due to two large land transfers to Alaska upon statehood and to Native Alaskans pursuant to their land claims 3 excluding these transfers the four agencies increased their managed lands by about 34 million acres during the period through transfers from the Bureau of Land Management and new acquisitions 4 the four agencies managed over 50 percent of the land in five states over 25 percent of the land in seven additional states and over 27 percent of the nation s total acreage in fiscal year FY 1993 5 since FY 1993 the four agencies managed acreage has increased due to the expansion or creation of national forests wildlife refuges and parks 6 the amount of land encumbered for conservation purposes increased from about 51 million acres in FY 1964 to about 271 million acres in FY 1993 and 7 Congress has restricted additional federal lands for conservation purposes since FY 1993 **Federal Lands** United States. adopted for political rather than scientific reasons fail to promote biological diversity and may actually harm more creatures than they help At the same time Chase offers examples of conservation strategies that work but which are deemed politically incorrect and ignored In a Dark Wood provides the most thoughtful and complete account yet written of radical environmentalism And it challenges the fundamental but largely unexamined assumptions of preservationism such as those concerning whether there is a balance of nature whether all branches of ecology are really science and whether ecosystems exist In his new introduction Chase evaluates the response to his book and reports on recent developments in environmental science policy and politics In a Dark Wood was judged by a recent national poll to be one of the one hundred best nonfiction books written in the English language during the twentieth century A smashing good read this book will be of interest to environmentalists ecologists philosophers biologists and bio ethicists and anyone concerned about ecological issues

Month in Review ... ,1995-03 *A Burning Issue* Robert Henry Nelson,2000 Created in the early 20th century to provide scientific management of the nation s forests the U S Forest Service was for many years regarded as a model agency in the federal government The author contends that this reputation is undeserved and the Forest Service s performance today is unacceptable Not only has scientific management proven impossible in practice it is also objectionable in principle Furthermore the author argues that the Forest Service lacks a coherent vision and prefers to sponsor only fashionable environmental solutions most recently ecosystem management Describing its history and failures the author advocates replacing the service with a decentralized system to manage the protection of national forests **Federal Public Land Laws and Policies Relating to Intensive Agriculture: Final report** ,1969
