Feline Oncology:

Canine and Feline Oncology. From Theory to Practice Guillermo C. Couto, Néstor Moreno

Casanova, 2020-08-27 T00:00:00+02:00 Veterinary oncology is a specialty that is advancing at a very fast pace. This allows clinicians to have more and more resources at their disposal to treat their patients and at the same time requires them to have an in-depth and constantly updated knowledge of the subject. In order to help veterinary surgeons in this task, this book titled *Oncology from theory to practice* describes in detail and in an educational and accessible manner the basic and modern knowledge in this discipline always from a practical point of view. Together with the essential aspects and the latest advances in oncology, this book includes a chapter about the most common specific neoplasms in daily practice, their protocols and recommended treatments, as well as several real clinical cases through which readers will be able to evaluate their knowledge of the subject. A book to turn veterinary oncology into one more of the specialties offered in daily practice.

Canine and Feline Geriatric Oncology Alice Villalobos, Laurie Kaplan, 2008-02-28 Half the population of dogs and cats aged 10 and over will die of neoplasia. The bonds that clients have developed with their older pets are especially strong and drive the increasing demand for more proficient and highly compassionate medical treatment of companion animals diagnosed with cancer. This book offers more than just a competent clinical approach to the most common tumors in dogs and cats. This book also offers a focus on the special needs of geriatric pets and their owners. Amply illustrated with dozens of case studies representative of those regularly encountered in practice, *Canine and Feline Geriatric Oncology* will provide readers with the tools needed to diagnose and treat aging pets with cancer and to help clients make the best decisions for themselves and for the animals with whom they share their lives. *Canine and Feline Geriatric Oncology* is a unique resource. It is a useful oncology reference for specialists, veterinarians in general practice, veterinary technicians, and clinic staff. The many what-ifs that the practitioner inevitably faces in interactions with clients and their aging pets with cancer are presented and discussed. **Special Features:** Focuses on the special needs of geriatric pets and their caregivers. Offers direction in the diagnosis and treatment of aging pets with cancer. Addresses many of the what-ifs that arise in interactions with clients and aging pets with cancer. Amply illustrated with full color throughout. A valuable reference for practicing veterinarians, technicians, hospital staff, and professionals involved in supportive counseling for pet caregivers.

Therapeutic Strategies in Veterinary Oncology Chand Khanna, 2023-08-23 This book is a comprehensive resource for veterinary oncologists and trainees covering therapeutic strategies used in the treatment of veterinary patients. In the setting of a rapidly changing field like oncology, this timely text focuses on mechanisms of action and biological rationale rather than current specific clinical recommendations, allowing current and future clinicians to adapt treatment approaches as our understanding of the biology of cancer evolves. With each chapter written by experts in their field, this book provides informative figures that convey this biological understanding and rationale of therapy. It starts from the mechanisms of treatment as we currently understand

them covering radiation therapy chemotherapy immunotherapy targeted therapy and many more Dispensing vital detailed and practical information about the different therapeutic strategies available this book is a vital resource for practicing veterinarians while also providing students of veterinary oncology with a better understanding of the key differences between different treatment strategies *Advances in Veterinary Oncology, An Issue of Veterinary Clinics of North America: Small Animal Practice* Annette N. Smith, 2014-09-28 This issue focuses on new advances in oncology in treating dogs and cats Topics include Use of metronomic chemotherapy in veterinary cancer patients Evidence based integrative medicine in clinical veterinary oncology The role of surgery in multimodality cancer therapy for small animals Cancer screening tests for small animals Antibiotic use in veterinary oncology patients Tyrosine kinase inhibitors in veterinary oncology practice Stereotactic radiosurgery Advances in veterinary radiation therapy Tumor vaccines in veterinary oncology practice Chemotherapy safety in clinical veterinary oncology Role of neutering in cancer development and more

Insights in Veterinary Cancer Immunology Carlos Eduardo Fonseca-Alves, Cristina Massoco, Felisbina Luisa

Queiroga,2025-01-14 The tumour microenvironment TME is essential for cancer maintenance and is responsible for several antitumor characteristics such as immune system avoidance resistance to anticancer therapies invasion and metastasis The TME is composed of several components including fibroblasts extracellular matrix proteins pericytes and immune cells The immune cells including T lymphocytes are responsible for fighting cancer cells inducing cell death However cancer cells develop several mechanisms to avoid the immune system including mutations to change the antigens originally recognised by T cells Tumours that can avoid the immune system including the T cell antitumor response are known as nonimmunogenic tumours or cold tumours The main characteristic of this tumour subtype is lack of response to immunotherapy drugs In contrast immunogenic or hot tumours have an active T cell antitumor response and respond well to immunotherapy Therefore elucidating the TME characteristics is the first step for the application in clinical practice In recent years there has been progress in understanding how the immune system and inflammation are associated with different cancer subtypes In 2018 the Nobel Prize in Physiology and Medicine was awarded for the discovery of cancer therapy by the inhibition of negative immune regulation Since then there has been an increase in global attention directed towards the immune system and its implications for cancer therapy Tumour progression is highly dependent of modifications in the TME which are directly related with patient s prognosis and present direct impacts on chemotherapy efficiency Investigating and comprehending the TME composition during tumour progression allows new therapeutic strategies and approaches personalized to each patient Thus understanding its complex interactions leads to different strategies to reprogramming TME for therapeutic purposes The main goal of this special issue is to bring together manuscripts focused on cancer immunology with a translational approach We welcome Original Research and Review articles from investigators worldwide that will stimulate the continuing efforts to understand the interactions with tumour microenvironment including 1 Identification of immune cells as a prognostic factor for cancer in veterinary patients 2 Stratification of tumour in animals according to its immunological content hot or cold tumours 3 Specific therapies targeting immune system components with translational potential 4 Genetic and epigenetic cancer modifications associated with the immune cells 5 Therapeutic implications of antitumor vaccines in small animals Cancer in Companion Animals, An Issue of Veterinary Clinics of North America: Small Animal Practice Philip J Bergman,Craig Clifford,2019-07-27 This issue of Veterinary Clinics Small Animal Practice edited by Dr Philip Bergman and Dr Craig Clifford focuses on Cancer in Companion Animals Topics include Novel Non Invasive Diagnostics MCT Cytologic and Histologic Grading Update Sentinel LN RT Oncology Update Novel Prescriptions for LSA Targeted Prescriptions Update Electrochemotherapy Tumor Ablation Anorexia and the Cancer Patient Histiocytic Sarcome and HSA Cancer Immunotherapies and Personalized Cancer Medicine **Feline Soft Tissue and General Surgery** Sorrel J Langley-Hobbs,Jackie Demetriou,Jane Ladlow,2013-10-01 While the practice of feline general and oncologic surgery has developed greatly in recent years the option of referral for some cat owners is not always a viable one

The increasing requirement for the general veterinarian to be competent in performing feline surgery has not however been supported by a dedicated text on the subject. Feline General and Oncological Surgery assembles an international team of editors and contributors to present the first comprehensive resource devoted solely to all aspects of soft tissue surgeries in the cat. Techniques are covered in a practical and detailed how to manner and range from the common to the more specialized ensuring the widest possible appeal. The book divides into several sections initially considering the general approach to the feline surgery patient and then proceeding to detailed coverage of surgery by anatomic location. Part 1 deals with the basics of feline anesthesia, analgesia, preoperative and postoperative care of the patient, surgical instrumentation and surgical principles for oncology cases. Part 2 covers surgical techniques of general and oncological feline diseases and injuries which are explained as step by step methods with many specially prepared schematic illustrations specific to the cat. Emphasis is on presenting both classical methods and new techniques. Feline Soft Tissue and General Surgery is the perfect sister text to Feline Orthopedic Surgery and Musculoskeletal Disease also published by Elsevier. Together they comprise a comprehensive and complete literature giving practical coverage of all possible surgical procedures in the cat. Provides a comprehensive detailed and up to date summary of all available information on all aspects of feline general and oncological surgery. Gives detailed practical information on how to operate on cats with medical conditions, internal disease and neoplasia. Gives access to website showing videoclips of key surgical procedures. International author team offers worldwide expertise and appeal. Lavish full colour line drawings and photographs throughout.
