Feminism And Ecological Communities An Ethic Of Flourishing:

Feminism and Ecological Communities Christine Cuomo, 2002-09-11 *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement. It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism. Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions. Exploring the dualisms of nature/culture and masculine/feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring. *Feminism and Ecological Communities* asks whether women are essentially closer to nature than men and how we ought to link the oppression of women, people of colour and other subjugated groups to the degradation of nature. Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle, John Dewey, Donna Haraway and Maria Lugones. A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature/culture distinction and how this can enrich ecofeminist ethics and politics. An outstanding new argument for an ecological feminism that links both theory and practice. *Feminism and Ecological Communities* bravely redraws the ecofeminist map. It will be essential reading for all those interested in gender studies, environmental studies and philosophy.

Feminism and Ecological Communities Chris J. Cuomo, 1997-11 If some of our values have contributed to the creation of a toxic and damaged planet and to the maintenance of systems of oppression based on gender, race and other types of differences, any attempts to foster alternative values requires attention to social and as well as ecological concerns. *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement. It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism while persuasively supporting a strong new case for ecofeminism. Chris J Cuomo explores the dualisms of nature/culture and masculine/feminine that defend many contemporary ecofeminist positions and questions traditional feminist analyses of gender and caring. Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures including Aristotle, John Dewey and Donna Haraway.

Recognizing the Autonomy of Nature Thomas

Heyd, 2005-11-09 How do the ways in which we think about and describe nature shape the use and protection of the environment? Do our seemingly well intentioned efforts in environmental conservation reflect a respect for nature or our desire to control nature's wildness? The contributors to this collection address these and other questions as they explore the theoretical and practical implications of a crucial aspect of environmental philosophy and policy: the autonomy of nature. In focusing on the recognition and meaning of nature's autonomy and linking issues of metaphysics, epistemology, ethics, and policy, the essays provide a variety of new perspectives on human relationships to nature. The authors begin by exploring what is meant by nature, in what sense it can be seen as autonomous, and what respect for the autonomy of nature might entail. They examine the conflicts that arise between the satisfaction of human needs (food, shelter, etc.) and the natural world. The contributors also consider whether the activities of human beings contribute to nature's autonomy. In their investigation of these issues, they not only draw on philosophy and ethics; they also discuss how the idea of nature's autonomy affects policy decisions regarding the protection of agricultural, rural, and beach areas. The essays in the book's final section turn to management and restoration practices. The essays in this section pay close attention to how efforts at environmental protection alter or reinforce the traditional relationship between humans and nature. More specifically, the contributors examine whether management practices as they are applied in nature conservation actually promote the autonomy of nature or whether they turn the environment into a client for policymakers.
