Feminism And Bioethics Beyond Reproduction:

Feminism & Bioethics Susan M. Wolf, 1996-04-11 Bioethics tackles the most vexing problems in health care and the biological sciences from reproductive technologies to euthanasia the AIDS epidemic mapping the human genome human subjects research and health care reform Yet surprisingly little attention has been paid to the special problems faced by women and to feminist analyses of current health care issues other than reproduction This breakthrough volume of original essays authored by leading figures in bioethics and feminist theory moves beyond the areas of reproduction and nursing taking bioethics into new territory The book starts with an investigation of the relationship between feminism and bioethics and introduces different approaches to the problem These chapters stress the importance of liberal feminism that prefers feminist over feminine analysis integrates the experience of women of color draws from the women s self help movement and uses the feminist stand point theory In the second part of the book the authors apply the feminist perspective to different bioethics problems euthanasia AIDS the definition of health doctor patient communication the Human Genome Project the conduct of biomedical research and health care reform They demonstrate the gain and benefit that results when bioethics pays attention to gender and feminism This volume will change the way bioethicists students patients and the public think about these profoundly challenging problems

Feminism & Bioethics Susan M. Wolf, 2011 This breakthrough volume was one of the first to map the possibilities of feminist analysis in bioethics After an extended introduction by Susan M Wolf on Gender and Feminism in Bioethics the book offers twelve chapters These include chapters by Dorothy E Roberts on Reconstructing the Patient Starting with Women of Color Rebecca S Dresser on What Bioethics Can Learn from the Women s Health Movement Vanessa Merton on Ethical Obstacles to the Participation of Women in Biomedical Research Ruth Faden et al on Women as Vessels and Vectors Lessons from the HIV Epidemic and Susan M Wolf on Gender Feminism and Death Physician Assisted Suicide and Euthanasia A multidisciplinary group of authors including scholars of law philosophy disability theory public health and genetics consider perspectives including communicative ethics standpoint theory and pragmatism Among the reviews are the following Drawing on work from top feminist bioethicists philosophers and law professors Susan Wolf s anthology *Feminism and Bioethics* reinforces the vibrancy of feminist theoretical contributions to bioethical thinking The twelve articles accompanied by Wolf s extensive introduction suggest how feminism s insights and critiques refine our thinking on a wide range of bioethical issues Wolf s book confirms that feminist approaches are no longer marginal or to be dismissed by mainstream bioethics one fails to engage these contributions at his her own peril as a legitimate scholar teacher or practitioner in this field Leslie Bender *Journal of Law Medicine Ethics* Vol 25 No 58 1997 *Feminism and Bioethics Beyond Reproduction* distinguishes itself not only among works in bioethics but among works at the intersection of bioethical issues and feminist methods Taking readers beyond reproduction not to the brink of revolution but toward reconstruction in bioethics Wolf s volume proceeds by illuminating how the field its categories and its arguments were constructed in the first

place within necessarily gendered institutions and discourses From its first pages the volume proves that in personal experience and intellectual inquiry gender matters Lisa S Parker Theoretical Medicine and Bioethics Vol 19 No 411 1998

Concepts and Cases in Nursing Ethics - Fourth Edition Michael Yeo, Anne Moorhouse, Pamela Khan, Patricia Rodney, 2020-04-30 A portion of the revenue from this book's sales will be donated to Doctors Without Borders to assist the humanitarian work of nurses doctors and other health care providers in the fight against COVID 19 and beyond Concepts and Cases in Nursing Ethics is an introduction to contemporary ethical issues in health care designed especially for Canadian audiences The book is organized around six key concepts beneficence autonomy truth telling confidentiality justice and integrity Each of these concepts is explained and discussed with reference to professional and legal norms The discussion is then supplemented by case studies that exemplify the relevant concepts and show how each applies in health care and nursing practice This new fourth edition includes an added chapter on end of life issues and it is revised throughout to reflect the latest developments on topics such as global health ethics cultural competence social media and palliative sedation as well as ethical issues relating to COVID 19

Transformed States Martin Halliwell, 2024-11-15 Honourable Mention British Association of American Studies Book Award Transformed States offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from Oryx and Crake to Annihilation and from Gattaca to Avatar By assessing the complex relationship between federal politics and the biomedical industry Transformed States develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books Therapeutic Revolutions 2013 and Voices of Mental Health 2017 Transformed States is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to the global emergency of COVID 19

Medical Entanglements Kristina Gupta, 2019-10-25 Medical Entanglements uses intersectional feminist queer and crip theory to move beyond for or against approaches to medicine Drawing on case studies the book argues that most medical interventions will simultaneously reinforce inequality and alleviate individual suffering

Thus the book argues that feminists should allow individuals choice in regards to medical intervention while working to dismantle systems of oppression

Contemporary Feminist Theory and Activism Wendy Lynne Lee, 2009-12-30 In this book Wendy Lynne Lee sets out to demonstrate how feminist theorizing is relevant to issues that may seem less directly about the status and emancipation of women but that are vital she argues to forming connections with other important twenty first century movements Lee shows how a feminist approach to crafting these connections can shed light on the economic disparity and entrenched gender inequality of global markets the role technology plays in our conception of reproductive rights sexual identity and gender the rise of religious fanaticism and the relationship between our conceptions of gender nonhuman animals and the environment Timely politically passionate and forcefully argued Contemporary Feminist Theory and Activism will reinvigorate feminist thought for the twenty first century

Altering Nature B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-11-01 B Andrew Lustig Baruch A Brody and Gerald P McKenny In this second volume of the Altering Nature project we situate specific religious and policy discussions of four broad areas of biotechnology within the context of our interdisciplinary research on concepts of nature and the natural in the first volume Altering Nature Concepts of Nature and the Natural in Biotechnology Debates In the first volume we invited five groups of scholars to explore the diverse conc tions of nature and the natural that shape moral judgments about human alterations of nature as especially exemplified by recent developments in biotechnology A careful reading of such developments reveals that assessments of them whether positive or negative are often informed by different conceptual interpretations of nature and the natural with differing implications for judgments about the app priateness of particular alterations of nature These varying interpretations of nature and the natural often result from the distinctive perspectives that characterize va ous scholarly disciplines Therefore in an effort to explore the variety of meanings that attend discussions of the concepts of nature and the natural the contributors to the first volume of Altering Nature addressed those concepts from five different disciplinary vantages A first group of scholars analyzed a range of religious and spiritual perspectives on concepts of nature and the natural Their research highlighted the thematic h torical and methodological touchstones in those traditions that shape their persp tives on nature

Rethinking Rural Health Ethics Christy Simpson, Fiona McDonald, 2017-08-13 This book challenges readers to rethink rural health ethics Traditional approaches to health ethics are often urban centric making implicit assumptions about how values and norms apply in health care practice and as such may fail to take into account the complexity depth richness and diversity of the rural context There are ethically relevant differences between rural health practice and rural health services delivery and urban practice and delivery that go beyond the stereotypes associated with rural life and rural health services This book examines key values in the rural context that have not been fully explored or taken into account when we examine health ethics issues including the values of community and place and a need to revalue relationships It also advocates for a greater attention to meso and macro level analysis in rural health ethics as being critical to ethical analysis of

rural health care This book is essential reading for those involved in health ethics rural health policy and governance and for rural health providers Vision and Values Judith A. Dwyer,1999-08-27 A concise introduction to Christian ethics this book surveys the moral values of the Catholic tradition and applies them to contemporary issues Prominent authors address such topics as scriptural sources reverence for human life sexuality and intimacy family responsibilities the concept of peace in the modern world economics and Catholic higher education Vision and Values is both an overview of the major perspectives which inform moral decisions and a guide to how these principles interrelate It can help readers determine how to make complex moral judgments in a Christian context as it demonstrates the vitality of the Catholic theological tradition

human behaviors and practices Moves beyond other lesbian and gay studies readers by presenting a broader view of the significance of studying same sex cultures and sexualities across cultures Offers readings from all four subfields of anthropology cultural biological linguistic and archaeological along with historical and applied anthropology Includes discussion of biotechnology and bioethics health and illness language ethnicity identity politics post colonialism kinship development and policymaking Adam, Eve, and the Genome Susan Brooks Thistlethwaite, Explores the ethical issues posed by genetic engineering A Companion to African-American Philosophy Tommy L. Lott, John P. Pittman, 2003-04-11 This wide ranging multidisciplinary collection of newly commissioned articles brings together distinguished voices in the field of African philosophy and African American social and political thought Provides a comprehensive critical survey of African American philosophical thought Collects wide ranging multidisciplinary newly commissioned articles in one authoritative volume Serves as a benchmark work of reference for courses in philosophy social and political thought cultural studies and African American studies **Taking Biology Seriously** Inmaculada de Melo-Martín, 2005 Inmaculada de Melo Martín carefully defend the importance of social and political policies to guide the bio ethical co construction of a better life for all As she argues with edifying balance only by taking biology seriously can we become serious in appreciating its true benefits and counter the illusory hopes and fears that are often projected upon it Carl Mitcham Colorado School of Mines

Genetics and Gene Therapy Sheila A.M. McLean, 2017-09-08 Genetics and Gene Therapy shows the wide range of the debate and the very real significance that genetics and its associated developments have for human beings individually and collectively Few areas of science and medicine have resulted in the volume of academic and popular literature as has genetics The so called revolution in understanding of the causes of disease states and even behavioural traits has focussed public attention on the influence of genes in making us what we are Rapidly however the potential benefits of such understanding were overtaken in the public mind at least by the question of the possible negative implications of genetic knowledge and associated technologies The chapters in this volume show just how wide ranging concern has become ranging from regulation to cloning with the fear of discrimination in between Part One begins with a range of general discussions of about the genetic enterprise itself followed by consideration of some specific questions Part Two then addresses cutting edge debates in genetics **The Politics of Women's Health** Susan Sherwin, Feminist Health Care Ethics Research Network, 1998 Examines the real world of women's health status and health care delivery in different countries and the assumptions behind the dominant medical model of solving problems without regard to social conditions This book asks what feminist health care ethics looks like if we start with women's experiences and concerns The Ethics of Gender-specific Disease Mary Ann Gardell Cutter, 2012 Our understanding of gender carries significant bioethical implications An errant account of gender specific disease can lead to overgeneralizations undergeneralizations and misdiagnoses It can also lead to problems in the structure of health care delivery the creation of policy and the development of clinical curricula In this

volume Cutter argues that gender specific disease and related bioethical discourses are philosophically integrative Gender specific disease is integrative because the descriptive roles of gender disease and their relation are inextricably tied to their prescriptive roles within frames of reference An integrative account of gender specific disease carries ethical implications because our understanding of gender specific disease is evaluative and our evaluations of gender specific disease entail judgments concerning the praiseworthiness and blameworthiness of a clinical event Cutter supports a both and emphasis on context and integration in relation to gender specific disease and bioethical analyses While the text mainly focuses on gender specific diseases that affect women Cutter also includes examples involving men children and members of the LGBT community

Global Feminist Ethics Peggy DesAutels, Rebecca Whisnant, 2008 This volume is fourth in the series of annuals created under the auspices of The Association for Feminist Ethics and Social Theory FEAST The topics covered herein_ from peacekeeping and terrorism to sex trafficking and women s paid labor to poverty and religious fundamenta
