Fertility Class And Gender In Britain 1860 194:

Fertility, Class and Gender in Britain, 1860-1940 Simon Szreter, 2002-07-25 This book offers an original interpretation of the history of falling fertilities in Britain between 1860 and 1940 It integrates the approaches of the social sciences and of demographic feminist and labour history with intellectual social and political history It exposes the conceptual and statistical inadequacies of the orthodox picture of a national unitary class differential fertility decline and presents an entirely new analysis of the famous 1911 fertility census of England and Wales Surprising and important findings emerge concerning the principal methods of birth control births were spaced from early on in marriage and sexual abstinence by married couples was a far more significant practice than previously imagined The author presents a new general approach to the study of fertility change raising central issues concerning the relationship between history and social science

The Politics of Domestic Authority in Britain since 1800 L. Delap, B. Griffin, A. Wills, 2009-08-13 This collection of essays explores the broad range of influences which have shaped the distribution of authority within British homes and families religion commercial advertising governments welfare professionals medical experts psychologists and the law

Gender Inequalities, Households and the Production of Well-Being in Modern Europe Tindara Addabbo, Marie-Pierre Arrizabalaga, Alastair Owens, 2016-04-22 Feminist scholars have long pointed out the relevance of the unpaid work that goes on within European households in sustaining the well being of the continent's populations However care work and domestic labour continue to be largely unremunerated and unequally distributed by gender This unique volume of interdisciplinary essays casts new light on the roles that households play in securing the well being of individuals and families uncovering the processes of bargaining and accommodation and conflict and compromise that underpin them Contributors put gender at the centre of their analyses demonstrating the uneven experiences of men and women as both providers and receivers of welfare in European households in both the past and the present As European states grapple with changing family forms a growing population of dependent people increased participation of women in labour markets and a profound shift in the nature and organisation of work this book makes a timely contribution to our understanding of the critical role played by households in mediating processes of economic and social change It offers new challenges to scholars researchers and policy makers eager to address gender inequalities and enhance well being This book is the second of four volumes being published as part of Ashgate's Gender and Well Being series that arise from a programme of international symposia funded by the European Science Foundation under the auspices of COST European Cooperation in the field of Scientific and Technical Research

A Hundred English Working-Class Lives, 1900-1945 Rebecca Ball, 2024-07-11 Stanley Rice born in London in 1905 began his autobiography by stating that his life was an ordinary average life with all its ups and downs Stanley may have described his life as ordinary and yet he lived through a period of rapid social change including two world wars Despite this Stanley assumed that his life story would be of little interest to most readers as he had not achieved great fame or any notable

accolades This book argues that this is exactly why historians should focus on such life stories as there is much to be gained by focusing on memories of ordinary average lives as they can expand our knowledge of the past often revealing firsthand experiences that have been excluded from the historical record This book does not intend to be a general social history of the working class Rather it is a work of memory drawing upon a microhistory methodology to examine how a sample of one hundred working class autobiographers remembered and wrote about living through years that were punctuated by two worldwide conflicts and a global economic depression

Gender-Competent Legal Education Dragica

Vujadinović,Mareike Fröhlich,Thomas Giegerich,2023-02-03 Male dominated law and legal knowledge essentially characterized the whole of pre modern history in that the patriarchy represented the axis of social relations in both the private and public spheres Indeed modern and even contemporary law still have embedded elements of patriarchal heritage even in the secular modern legal systems of Western developed countries either within the content of legislation or in terms of its implementation and interpretation This is true to a greater or lesser extent across legal systems although the secular modern legal systems of the Western developed countries have made great advances in terms of gender equality The traditional understanding of law has always been self evidently dominated by men but modern law and its understanding have also been more or less malestreamed Therefore it has become necessary to overcome the given maskulinity of legal thought In contemporary legal and political orders gender mainstreaming of law has been of the utmost importance for overcoming deeply and persistently embedded power relations and gender based unequal social relations At the same time and equally importantly the gender mainstreaming of legal education to which this book aims to contribute can help to gradually eliminate this male dominance and accompanying power relations from legal education and higher education as a whole This open access textbook provides an overview of gender issues in all areas of law including sociological historical and methodological issues Written for students and teachers around the globe it is intended to provide both a general overview and in depth knowledge in the individual areas of law Relevant court decisions and case studies are supplied throughout the book

Women and Their Money 1700-1950 Anne Laurence,Josephine Maltby,Janette Rutterford,2008-11-20

This volume explores the activities of women as investors and managers of wealth across the globe from the early 18th century to the mid 20th century

Men and masculinities in modern Britain Matt Houlbrook,Katie Jones,Ben Mechen,2024-01-16 Men and masculinities provides an engaging accessible and provocative introduction to histories of masculinity for all readers interested in contemporary gender politics The book offers a critical overview of ongoing historiographical debates and the historical making of men s lives and identities and ideas of masculinity between the 1890s and the present day In setting out a new agenda for the field it makes an ambitious argument for the importance of writing histories which are present centred and politically engaged This means that the book engages head on with ferocious debates about men s social position and the status of masculinity in contemporary public life In establishing a critical genealogy for

the proliferation of this crisis talk it sets out new ways of understanding how men's lives and ideas of masculinity have changed over time while patriarchy and male power have persisted

Fertility, Conjuncture, Difference Philip Kreager, Astrid Bochow, 2017-09-01 In the last forty years anthropologists have made major contributions to understanding the heterogeneity of reproductive trends and processes underlying them Fertility transition rather than the story of the triumphant spread of Western birth control rationality reveals a diversity of reproductive means and ends continuing before during and after transition This collection brings together anthropological case studies placing them in a comparative framework of compositional demography and conjunctural action The volume addresses major issues of inequality and distribution which shape population and social structures and in which fertility trends and the formation and size of families are not decided solely or primarily by reproduction

Religion and the Demographic Revolution Callum G. Brown, 2012 In the 1960s Christian religious practice and identity declined rapidly and women's lives were transformed spawning a demographic revolution in sex family and work The argument of this book is that the two were intimately connected triggered by an historic confluence of factors

Ageing Without Children Philip Kreager, Elisabeth Schröder-Butterfill, 2005-03-01 Rapid fertility declines and improved longevity are now shifting the overall balance of population towards older ages in many parts of the world Within this growing population of older people there are many groups with particular needs about which relatively little is known This collection focuses on one such sub population the elderly without children Few would deny that childlessness poses potential human and welfare problems for older people without them What is less well known is that comparative anthropological and historical demographic research indicates that childlessness is a recurring social phenomenon that has affected 1 in 5 older women in many cultures and historical periods High levels of childlessness arise not solely or primarily from biological factors like primary sterility but from a combination of actors Many like non marriage delayed childbearing and pathological sterility reflect the interaction of social and biological influences Also of major importance are factors that remove the support of children from elders lives migration mortality divorce remarriage family enmity social mobility and the pressing demands of family and career on younger generations The papers collected in this volume employ a mixture of quantitative and qualitative methods to define and characterize the experience of ageing without children

The Demographics of Empire Karl Ittmann, Dennis D. Cordell, Gregory H. Maddox, 2010-10-05 The Demographics of Empire is a collection of essays examining the multifaceted nature of the colonial science of demography in the last two centuries The contributing scholars of Africa and the British and French empires focus on three questions How have historians demographers and other social scientists understood colonial populations What were the demographic realities of African societies and how did they affect colonial systems of power Finally how did demographic theories developed in Europe shape policies and administrative structures in the colonies The essays approach the subject as either broad analyses of major demographic questions in Africa's history or focused case

studies that demonstrate how particular historical circumstances in individual African societies contributed to differing levels of fertility mortality and migration Together the contributors to *The Demographics of Empire* question demographic orthodoxy and in particular the assumption that African societies in the past exhibited a single demographic regime characterized by high fertility and high mortality

Consuming Behaviours Erika Rappaport, Sandra Trudgen Dawson, Mark J. Crowley, 2015-07-30 In twentieth century Britain consumerism increasingly defined and redefined individual and social identities New types of consumers emerged the idealized working class consumer the African consumer and the teenager challenged the prominent position of the middle and upper class female shopper Linking politics and pleasure *Consuming Behaviours* explores how individual consumers and groups reacted to changes in marketing government control popular leisure and the availability of consumer goods From football to male fashion tea to savings banks leading scholars consider a wide range of products ideas and services and how these were marketed to the British public through periods of imperial decline economic instability war austerity and prosperity The development of mass consumer society in Britain is examined in relation to the growing cultural hegemony and economic power of the United States offering comparisons between British consumption patterns and those of other nations Bridging the divide between historical and cultural studies approaches *Consuming Behaviours* discusses what makes British consumer culture distinctive while acknowledging how these consumer identities are inextricably a product of both Britain's domestic history and its relationship with its Empire with Europe and with the United States

Forthcoming Books Rose Arny, 1996-06

Festival of the Poor Jane Schneider, 1996-04 The historical decline of fertility in Europe has occupied a central place in social history and demography over the past quarter century Most scholars credit Europeans with modulating sexual behavior through either abstinence or the practice of coitus interruptus as a rational choice made in the interest of personal economic comfort yet peasant and working classes have typically lagged behind in birth control and have given rise to the adage that sexual embrace is the festival of the poor Scholarly analyses of lag often

reinforce this stigmatizing view Now this subject is given a fresh look through a case study in Sicily one of the last outposts of Western Europe s demographic transition By examining population changes in a single community between 1860 and 1980 the authors offer an extended review and critique of existing models of fertility decline in Europe proposing a new interpretation that emphasizes historical context and class relations They show how the spread of capitalism in Sicily induced an unprecedented rate of population growth with boom and bust cycles creating the class experiences in which reputational networks came to redefine family life how Sicilians began to control their fertility in response to class mediated ideas about gender relations and respectable family size and how the town s gentry artisan and peasant classes adopted family planning methods at different times in response to different pressures Jane and Peter Schneider s anthropologically oriented political economy perspective challenges the position of Western Europe as a model for fertility decline on which every other case should converge looking instead at the diversity of cultural ideals and practices such as those found in Sicily that influence the spread and form of birth control Combining anthropological oral historical and archival methods in new and insightful ways the authors synthesis of a particular case study with a broad historical and theoretical discussion will play a major role in the ongoing debates over the history of European fertility decline and point the way toward integrating the analysis of demographic upheaval with the study of class formation and ideology **Arts & Humanities Citation Index** ,2000
