**The Oxford Handbook of Women and the Economy** Susan L. Averett, Laura M. Argys, Saul D. Hoffman, 2018-05-15 The transformation of women s lives over the past century is among the most significant and far reaching of social and economic phenomena affecting not only women but also their partners children and indeed nearly every person on the planet In developed and developing countries alike women are acquiring more education marrying later having fewer children and spending a far greater amount of their adult lives in the labor force Yet because women remain the primary caregivers of children issues such as work life balance and the glass ceiling have given rise to critical policy discussions in the developed world In developing countries many women lack access to reproductive technology and are often relegated to jobs in the informal sector where pay is variable and job security is weak Considerable occupational segregation and stubborn gender pay gaps persist around the world The Oxford Handbook of Women and the Economy is the first comprehensive collection of scholarly essays to address these issues using the powerful framework of economics Each chapter written by an acknowledged expert or team of experts reviews the key trends surveys the relevant economic theory and summarizes and

critiques the empirical research literature By providing a clear eyed view of what we know what we do not know and what the critical unanswered questions are this Handbook provides an invaluable and wide ranging examination of the many changes that have occurred in women s economic lives *Promoting Gender Equality and Tackling Demographic Challenges* Jiajia Gu,Ms. Lisa L Kolovich,Dr. Jorge Mondragon,Ms. Monique Newiak,Michael Herrmann,2024-06-11 Two broad contrasting demographic trends present challenges for economies globally countries with aging populations often advanced economies and increasingly emerging markets anticipate a significant shrinking of the labor force with implications for growth economic stability and public finances Economies with rapidly growing populations as is the case in many low income and developing countries will face a burgeoning young population entering the labor market in the next decades a large potential to reap the demographic dividend if the right skills and economic and social conditions are in place This note highlights how gender equality in both cases can serve as a stabilizing factor to rebalance demographic trends As decisions regarding fertility human capital investment and labor force participation are interlinked policies should aim at relaxing households time and resource constraints that condition these choices This means that in general in advanced economies and emerging markets policies should facilitate women s work life choices and boost female participation in the labor market whereas policies in low income and developing countries should focus on reforms that narrow gender gaps in opportunities and support human capital accumulation *Worklife Balance* Barbara Hobson,2013-10-24 Across welfare societies we have seen the emergence of policies and norms for work life balance alongside rising expectations among working parents to be able to participate in employment and caregiving and to have more time for family life and leisure Yet despite this value placed upon work life balance working parents face increasing work demands as well as rising numbers of insecure and precarious jobs both of which produce a deepening sense of economic uncertainty in everyday life which has been intensified in the current period of financial crises The agency and capabilities gap addresses these tensions in work life balance within families workplace organizations and policy frameworks Inspired by Amartya Sen s capabilities approach this volume considers not just what individuals do but also their scope of alternatives to make other choices It includes rich contextualized studies across Western and Eastern European countries and Japan with a focus on gendered agency inequalities for work life balance **Understanding Family Change and Variation** Jennifer A. Johnson-Hanks,Christine A. Bachrach,S. Philip Morgan,Hans-Peter Kohler,2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process *Understanding Family Change and Variation Toward a Theory of Conjunctural Action* argues that social

demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture of agency versus structure or of biology versus society *The Social Meaning of Children and Fertility Change in Europe* Anne Lise Ellingsæter, An-Magritt Jensen, Merete Lie, 2013 Aiming to expand our comprehension of the complex structures and cultures that influence reproductive choice this book uses empirical studies from six nations France Scandinavia Denmark Norway Sweden Germany and Italy to show how different economic political and cultural contexts interact in young adults fertility rationales It will be of interest to students and scholars of sociology demography anthropology and gender studies
