Climate Change in Cities Sara Hughes, Eric K. Chu, Susan G. Mason, 2017-09-27 This book presents pioneering work on a range of innovative practices experiments and ideas that are becoming an integral part of urban climate change governance in the 21st century Theoretically the book builds on nearly two decades of scholarships identifying the emergence of new urban actors spaces and political dynamics in response to climate change priorities However it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches Empirically the chapters investigate new multi level urban governance arrangements from around the world and leverage the insights they provide for both theory and practice Cities both as political and material entities are increasingly playing a critical role in shaping the trajectory and impacts of climate change action However their policy planning and governance responses to climate change are fraught with tension and contradictions While on one hand local actors play a central role in designing institutions infrastructures and behaviors that drive decarbonization and adaptation to changing climatic conditions their options and incentives are inextricably enmeshed within broader political and economic processes Resolving these tensions and contradictions is likely to require innovative and multi level approaches to governing climate change in the city new interactions new political actors new ways of coordinating and mobilizing resources and new frameworks and technical capacities for decision making We focus explicitly on those innovations that produce new relationships between levels of government between government and citizens and among governments the private sector and transnational and civil society actors A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi level urban climate change governance Debra Roberts Co Chair Working Group II IPCC 6th Assessment Report AR6 and Acting Head Sustainable and Resilient City Initiatives Durban South Africa Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are Christopher Gore Associate Professor and Chair

Department of Politics and Public Administration Ryerson University Canada This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South Harriet Bulkeley Professor of Geography Durham University United Kingdom This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world from California to Canada India to Indonesia Marcus Foster and the Oakland Public Schools Jesse J. McCorry, 1978-01-01 Public Administration Evolving Mary E. Guy, Marilyn M. Rubin, 2015-03-02 Public Administration Evolving From Foundations to the Future demonstrates how the theory and practice of public administration has evolved since the early decades of the twentieth century Each chapter approaches the field from a unique perspective and describes the seminal events that have been influential in shaping its evolution This book presents major trends in theory and practice in the field provides an overview of its intellectual development and demonstrates how it has professionalized The range from modernism to metamodernism is reflected from the perspective of accomplished scholars in the field each of whom captures the history environment and development of a particular dimension of public administration Taken together the chapters leave us with an understanding of where we are today and a grounding for forecasting the future **Citizen, Customer, Partner** John Clayton Thomas, 2014-12-18 For almost a half a century scholars and practitioners have debated what the connections should be between public administration and the public Does the public serve principally as citizen owners those to whom administrators are responsible Are members of the public more appropriately viewed as the customers of government Or in an increasingly networked world do they serve more as the partners of public administrators in the production of public services This book starts from the premise that the public comes to government not principally in one role but in all three roles as citizens and customers and partners The purpose of the book is to address the dual challenge that reality implies 1 to help public administrators and other public officials to understand the complex nature of the public they face and 2 to provide recommendations for how public administrators can most effectively interact with the public in the different roles Using this comprehensive perspective Citizen Customer Partner helps students practitioners and scholars understand when and how the public should be integrated into the practice of public administration Most chapters in Citizen Customer Partner include multiple boxed cases that illustrate the chapter's content with real world examples The book concludes with an extremely useful Appendix that collects and summarizes the 40 Design Principles specific advice for public organizations on working with the public as customers partners and citizens
