Australian Politics at a Crossroads Matteo Bonotti, Narelle Miragliotta, 2024-02-29 As the 21st century proceeds apace
Australia faces new and old challenges both domestically and internationally These include managing complex governance
issues preventing democratic fracture balancing an ever shifting geopolitical strategic order addressing the recognition and
identity demands of marginalised groups and responding to crises and urgent policy challenges such as climate change
Bonotti Miragliotta and the other contributors to this volume analyse and evaluate the challenges which confront Australia by
locating them in their national and comparative context The various contributions reveal that while these challenges are
neither novel nor unique to Australia the way in which they manifest and Australia s responses to them are shaped by the

country's distinctive history culture geography location and size The chapters offer a cutting edge analysis of these pressing challenges faced by Australia and offer reflections on how to address them The book is a valuable resource for scholars and students of Australian politics and of comparative politics in a global perspective *Federal Regulation of State and Local Governments* United States. Rubin, 2000-03-28 Investigates the role of federal judges in prison reform and policy making in general Governing States and Localities Kevin B. Advisory Commission on Intergovernmental Relations, 1974 *State Formation After Civil War* Derek M Powell, 2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase

the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building American Federalism Carol S. Weissert,1975 Principles and Practice of American Politics Steven S. Smith,2024-08-28 Combining timeless readings with cutting edge current selections Principles and Practice of American Politics effectively animates today s institutions and political arrangements in the study of American Government and politics Each selection is artfully framed by contextual headnotes and many of the readings are written specifically for the volume The Eighth Edition includes readings that present institutions of majority rule the nature of racial discrimination the proper role of the court and other issues that provide students an opportunity to think through and discuss their views on the future direction of American civic life
