Feeding A Hungry Planet Rice Research Development In Asia Latin:

Feeding a Hungry Planet James Lang, 2000-11-09 Rice is the food crop the world depends on most In *Feeding a Hungry Planet* James Lang demonstrates how research has benefited rice growers and increased production He describes the life cycle of a rice crop and explains how research is conducted and how the results end up growing in a farmer's field Focusing on Asia and Latin America Lang explores lowland and upland rice systems genetics sustainable agriculture and efforts to narrow the gap between yields at research stations and those on working farms Ultimately says Lang the ability to feed growing populations and protect fragile ecologies depends as much on the sustainable on site farm technologies as on high yielding crop varieties Lang views agriculture as a chain of events linking the farmer's field with the scientist's laboratory and he argues that rice cultivation is shaped by different social systems cultures and environments Describing research conducted by the International Rice Research Institute in the Philippines and by the International Center for Tropical Agriculture in Colombia he shows how national programs tailor research to their own production problems According to Lang the interaction of research programs practical problem solving and local extension efforts suggests a new model for international development

The Economy of the Earth Mark Sagoff, 2007-12-03 Mark Sagoff draws on the last twenty years of debate over the foundations of environmentalism in this comprehensive revision of *The Economy of the Earth* Posing questions pertinent to consumption cost benefit analysis the normative implications of neo Darwinism the role of the natural in national history and the centrality of the concept of place in environmental ethics he analyses social policy in relation to the environment pollution the workplace and public safety and health Sagoff distinguishes ethical from economic questions and explains which kinds of concepts arguments and processes are appropriate to each He offers a critique preference and willingness to pay as measures of value in environmental economics and defends political cultural aesthetic and ethical reasons to protect the natural environment

Agrarian Crossings Tore C. Olsson, 2020-11-03 In the 1930s and 1940s rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity *Agrarian Crossings* tells the story of how these campaigns were conducted in dialogue with one another as reformers in each nation came to exchange models plans and strategies with their equivalents across the border Dismantling the artificial boundaries that can divide American and Latin American history Tore Olsson shows how the agrarian histories of both regions share far more than we realize He traces the connections between the US South and the plantation zones of Mexico places that suffered parallel problems of environmental decline rural poverty and gross inequities in land tenure Bringing this tumultuous era vividly to life he describes how Roosevelt's New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation's green revolution in Mexico which would become the most important Third World development campaign of the twentieth century and how the Mexican government attempted to replicate the

hydraulic development of the Tennessee Valley Authority after World War II Rather than a comparative history Agrarian Crossings is an innovative history of comparisons and the ways they affected policy moved people and reshaped the landscape

The Great American Mission David Ekbladh, 2011-08-08 The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences state planning civil society and technology to produce extensive social and economic change For proponents it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism Modernization took on profound geopolitical importance as the United States grappled with these threats After World War II modernization remained a means to contain the growing influence of the Soviet Union Ekbladh demonstrates how U S led nation building efforts in global hot spots enlisting an array of nongovernmental groups and international organizations were a basic part of American strategy in the Cold War However a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization The end of the Cold War further obscured modernization's mission but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats Using new sources and perspectives The Great American Mission offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad

Notes of a Potato Watcher James Lang, 2001 Native to the New World the potato was domesticated by Andean farmers probably in the Lake Titicaca basin almost as early as grain crops were cultivated in the Near East Full of essential vitamins and energy giving starch the potato has proved a valuable world resource Curious Spaniards took the potato back to Europe from whence it spread worldwide Today the largest potato producer is China with India not far behind To tell the potato's story Lang has done fieldwork in South America Asia and Africa

Jacket Decolonization and the Cold War Leslie James, Elisabeth Leake, 2015-02-26 The Cold War and decolonization transformed the twentieth century world This volume brings together an international line up of experts to explore how these transformations took place and expand on some of the latest threads of analysis to help inform our understanding of the links between the two phenomena The book begins by exploring ideas of modernity development and economics as Cold War and postcolonial projects and goes on to look at the era's intellectual history and investigate how emerging forms of identity fought for supremacy Finally the contributors question ideas of sovereignty and state control that move beyond traditional Cold War narratives Decolonization and the Cold War emphasizes new approaches by drawing on various methodologies regions themes and interdisciplinary work to shed new light on two topics that are increasingly important to historians of the twentieth century

Beriberi, White Rice, and Vitamin B Kenneth J. Carpenter, 2023-12-22 In this comprehensive account of the history and treatment of beriberi Kenneth Carpenter traces the decades of medical and chemical research that solved the

puzzle posed by this mysterious disease Caused by the lack of a minute quantity of the chemical thiamin or vitamin B1 in the diet beriberi is characterized by weakness and loss of feeling in the feet and legs then swelling from fluid retention and finally heart failure Western doctors working in Asia after 1870 saw it as the major disease in native armed forces and prisons It was at first attributed to miasms poisonous vapors from damp soil or to bacterial infections In Java chickens fed by chance on white rice lost the use of their legs On brown rice where the grain still contained its bran and germ they remained healthy Studies in Javanese prisons then showed beriberi also occurring where white rather than brown rice was the staple food Birds were used to assay the potency of fractions extracted from rice bran and after 20 years highly active crystals were obtained In another 10 years their structure was determined and thiamin was synthesized Beriberi is a story of contested knowledge and erratic scientific pathways It offers a fascinating chronicle of the development of scientific thought a history that encompasses public health science diet trade expanding empires war and technology From the preface This is a medical detective story beginning with the investigation of a disease that has killed or crippled at least a million people and then following up clues that ranged much wider One outcome was the production of a synthetic chemical that we now nearly all of us consume in small quantities each day in our food The detectives had a variety of professions and spoke different languages Their work ranged from studying the health of laborers in a primitive jungle to the painstaking dissection of individual grains of rice under a microscope The integrated story of their struggles and successes culled from old volumes in scattered libraries forms the subject of this book In this comprehensive account of the history and treatment of beriberi Kenneth Carpenter traces the decades of medical and chemical research that solved the puzzle posed by this mysterious disease Caused by the lack of a minute quantity of the chemical

The Right Kind of Revolution Michael E. Latham, 2011-01-15

After World War II a powerful conviction took hold among American intellectuals and policymakers that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world serving as a modernizing force around the globe By accelerating economic growth promoting agricultural expansion and encouraging the rise of enlightened elites they hoped to link development with security preventing revolutions and rapidly creating liberal capitalist states In *The Right Kind of Revolution* Michael E Latham explores the role of modernization and development in U S foreign policy from the early Cold War through the present The modernization project rarely went as its architects anticipated Nationalist leaders in postcolonial states such as India Ghana and Egypt pursued their own independent visions of development Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality damaging the environment and supporting coercive social policies In countries such as Guatemala South Vietnam and Iran U S officials and policymakers turned to modernization as a means of counterinsurgency and control ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s Since the end of the Cold War the faith in

modernization as a panacea has reemerged The idea of a global New Deal however has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways U S policymakers have continued to insist that history has a clear universal direction but events in Iraq and Afghanistan give the lie to modernization s false hopes and appealing promises
