Redemption from Addiction Gerard Jerry Egan, 2011-12-27 There are awesome and powerful creative forces that can be fully tapped that will absolutely unleash our dreams and hopes transforming them into a desired reality or these very same forces will send us into the deepest darkest Hell we have ever known If a person fails to understand that they have a huge responsibility to take full possession and control of this great creative power then that failure to take this responsibility will always lead to these forces taking control of the person in an undesirable destructive and potentially deadly manner In other words opportunities and temptations to use drugs or alcohol will present themselves as a direct result of failing to take control of these forces or misusing their power All addictions are a manifestation caused by the poor or improper use of these forces and powers The very Powers that govern the ability for anyone to accomplish anything in their lives for their good are the very same powers that can and will undermine and destroy those efforts This book will give you the essential Eleven Powers and Eleven Arts that will enable you to change your life The use of these Powers and Arts will enable you to take full control of not only your addiction but provide endless opportunities to create and design an entire new Destiny Addicts and alcoholics have inadvertently mastered the principles of success and use those very same concepts to assure their own failure and destruction By forcing yourself to do what you don't want to do enables you to gain hold of and grasp these powerful forces and turn them in the direction of success instead of failure Teach yourself and learn to direct the awesome creative forces within you and learn to turn your Possibilities into Probabilities

The Lonely American Jacqueline Olds, MD, Richard S. Schwartz, MD, 2009-02-01 In today's world it is more acceptable to be depressed than to be lonely yet loneliness appears to be the inevitable byproduct of our frenetic contemporary lifestyle According to the 2004 General Social Survey one out of four Americans talked to no one about something of importance to them during the last six months Another remarkable fact emerged from the 2000 U S Census more people are living alone today than at any point in the country's history fully 25 percent of households consist of one person only In this crucial look at one of America's few remaining taboo subjects loneliness Drs Jacqueline Olds and Richard S Schwartz set out to understand the cultural imperatives psychological dynamics and physical mechanisms underlying social isolation In The Lonely American cutting edge research on the physiological and cognitive effects of social exclusion and emerging work in the neurobiology of attachment uncover startling sobering ripple effects of loneliness in areas as varied as physical health children's emotional problems substance abuse and even global warming Surprising new studies tell a grim truth about social isolation being disconnected diminishes happiness health and longevity increases aggression and correlates with increasing rates of violent crime Loneliness doesn't apply simply to single people either today's busy parents cocoon

themselves by devoting most of their non work hours to children leaving little time for friends and other forms of social contact and unhealthily relying on the marriage to fulfill all social needs As a core population of socially isolated individuals and families continues to balloon in size it is more important than ever to understand the effects of a culture that idealizes busyness and self reliance It s time to bring loneliness a very real and little discussed social epidemic with frightening consequences out into the open and find a way to navigate the tension between freedom and connection in our lives
