Wilkinson and Pickett describe how these responses to hierarchies evolved and why the impacts of inequality on us are so severe In doing so they challenge the conception that humans are inescapably competitive and self interested They undermine too the idea that inequality is the product of natural differences in individual ability This book draws together many of the most urgent problems facing societies today but it is not just an index of our ills It demonstrates that societies based on fundamental equalities sharing and reciprocity generate much higher levels of well being and lays out the path towards them
