The Internet of Animals Deborah Lupton, 2023-03-07 The internet is made of cats is a half jokingly made claim Today animals of all shapes and sizes inhabit our digital spaces including companion animals wildlife feral animals and livestock In this book Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals Playfully building on the concept of The Internet of Things she discusses the complex feelings that have developed between people and animals through the use of digital devices from social media to employing animal like robots as companions and carers The book brings together a range of perspectives including those of sociology cultural geography environmental humanities critical animal studies and internet studies to consider how these new digital technologies are contributing to major changes in human animal relationships at both the micropolitical and macropolitical levels As Lupton shows while digital devices and media have strengthened people s relationships to other creatures these technologies can also objectify animals as things for human entertainment therapy or economic exploitation This original and engaging book will be of interest to scholars and students across the social sciences and humanities

Academic Libraries and Public Engagement With Science and Technology Eileen Harrington, 2019-03-28 Libraries have historically played a role as a community builder providing resources and spaces where knowledge can be archived shared and created They can also play a pivotal role in fostering the public s understanding of science and scientific processes From makerspaces to data visualization labs to exhibits many libraries already delve into scientific explorations and many more could join them Scientists often need to include broader impacts goals in grant proposals but they might not know where to begin or feel that they do not have the time to devote to public engagement This is where libraries and librarians can help Research in science communication also supports tapping into libraries for public engagement with science Studies show that it is important for scientists to present findings in an apolitical way not aligning with one solution or one way of thinking and not being seen as an activist Druckman 2015

Jamieson Hardy 2014 One of the core tenets of librarians and libraries is to present information in a neutral way Research also shows that Informal conversations about science can have a greater effect on people than reading about it online or hearing about it on the news Eveland Cooper 2013 Again libraries can play a role in fostering these types of conversations Given this landscape this book will demonstrate concrete ways that libraries and librarians can play a role in fostering public engagement with science In addition to background information on the current landscape of public knowledge and understanding of science it will also include best practices and case studies of different types of programming and services that libraries can offer Often libraries do not jump to mind when people think about science education or science literacy and many librarians do not come from a science background Literature on science programming and sharing science is largely absent from the library field This book will help give confidence to librarians that they can participate in engaging the public

with science At the same time it will provide a conduit to bring informal science educators communication officers from universities or research organizations who share scientific discoveries with the public and librarians together to explore ways to align their work to promote scientific literacy for all *Online Teaching Competency* Deanie French,2003 Blended Learning is designed for individuals who want to improve current skills or develop online teaching skills gradually as they begin to add web skills and resources to enhance their current teaching repertoire Many leaders from a variety of backgrounds have contributed chapters to make this book a valuable resource The depth and range of experts include but are not limited to Dr Deanie French whose publications include Web Accessibility Applications Seniors Healthcare and Higher Education Institute 2002 and Internet Based Learning An Introduction and Framework for Higher Education and Business Stylus Publishing 99 Dr Barbara Lyman author of Holistic Learning Model for On line Adults a chapter in Internet Based Learning Dr Bruce Landon senior advisor with the Western Cooperative for Educational Telecommunications WCET Dr Gene Martin Director of Extended and Distance Learning at Southwest Texas State University He has performed an active role in the advancement of technology education in the United States and has served as Chair for the National Commission for Technology Education Dr Karen Middleton senior project coordinator for the Western Cooperative managing a Hewlett funded project E learning Technologies Web Resource for Comparisons Dr Cyndi Rowland Director of the national project Keeping Web Accessibility in Mind WebAIM Dr Phil Vardiman human resource development expert with fortune 500 companies and Leo Valdes Managing Director of Vision Office a training and web consulting firm based in Vancouver British Columbia Canada He has delivered presentations related to Internet accessibility to the United Nations and representatives of South East Asia Latin America the Caribbean and Central and Eastern Europe For more information please visit www.e-linkagesglobal.com **Popular Mechanics** ,2000-01 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle Sys Admin ,1996 **Popular Science** ,2005-09 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better PC Magazine ,1986 *Microtimes* ,1996-09 **Backpacker** ,2000-03 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured A Public Service Tim Schwartz,2020-01-06 This timely book is a guide to any would be whistleblower any person considering the disclosure of information which
