Felix Roth Cary Fagan,2012 Felix Roth Cary Fagan,1999-01-01 **Intangible Assets, Productivity and Economic Growth** Carter Bloch,Aimilia Protogerou,Nicholas S. Vonortas,2024-02-15 This book advances our knowledge on intangibles and their role in productivity growth presenting a unique multi level perspective It encompasses micro meso and macro approaches that build upon firm industry and country level data and introduces novel layers of analysis A variety of empirical instruments are used in the book such as a large scale international survey input output analysis register data etc thus displaying fresh comparative evidence for Europe the USA China Korea and Japan The book also examines the subject within the global value chain context which is one of the most relevant phenomena of recent decades and assesses cross country trends drawing on a unique industry level database of intangible assets based on production input data from all over the world The book offers new insights on how to measure intangibles how they contribute to productivity growth and how policy can help foster intangibles investments and growth It will therefore be of great interest to scholars researchers and advanced students in the fields of economic growth innovation technology and business management , **Keeping Their Marbles** Tiffany Jenkins,2018 The story of how the museums of the West acquired their fabulous collections from the Benin Bronzes to Native American sacred objects and why they should not be returned to the lands or the people from which they came **The Art of Status** Jelena Subotić,2025-06-26 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact s historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Subotić examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotić tells the story of these artworks how they were looted how they ended up on display in national museums

and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution *The Master Cheesemakers of Wisconsin* James Norton, Becca Dilley, 2009-11-24 This book beautifully photographed and engagingly written introduces hardworking resourceful men and women who represent an artisanal craft that has roots in Europe but has been a Wisconsin tradition since the 1850s Wisconsin produces more than 600 varieties of cheese from massive wheels of cheddar and swiss to bricks of brick and limburger to such specialties as crescenza stracchino and juustoleipa These masters combine tradition technology artistry and years of dedicated learning in a profession that depends on fickle living ingredients to create the rich tastes and beautiful presentation of their skillfully crafted products Certification as a Master Cheesemaker typically takes almost fifteen years An applicant must hold a cheesemaking license for at least ten years create one or two chosen varieties of cheese for at least five years take more than two years of university courses consent to constant testing of their cheese and evaluation of their plant and pass grueling oral and written exams to be awarded the prestigious title James Norton and Becca Dilley interviewed these dairy artisans listened to their stories tasted their cheeses and explored the plants where they work They offer here profiles of forty three active Master Cheesemakers of Wisconsin as well as a glossary of cheesemaking terms suggestions of operations that welcome visitors for tours tasting notes and suggested food pairings and tasty nuggets shall we say curds of information on everything to do with cheese *Art or Scribbles? In the Eye of the Beholder: The Evolutionary Emergence of Visual Communication* Iain Davidson, 2025-09-08 The book is about how art arose and how it became what we call art today How did art emerge from the relationships between people and the things they produce and the ideas of producers How do people manipulate those relationships in their own society How do outsiders work out the ways in which those relationships were used to make art What is art and why are all people engaged with it in one way or another From its very beginning and everywhere art has always been embedded in its cultural context the contexts of the people who made and see it and that context has often been ritual The history of art confused social and institutional changes of view because western critics or artists sought to define the boundaries of art so tightly that ritual purposeful or utilitarian works were excluded from it In their definition art only existed if the rituals of the original producers were stripped from the works or if the objects were appropriated away from the situation in which they were produced The objects stripped from their context could then only be valued for their aesthetics Art consists of relationships between people things and ideas in quite specific ways Those relationships are discussed at length in this book The book is aimed at artists art historians and archaeologists but also at the general public interested in art It is intended both for people whose interest in art comes from
