Feminine Strength In Adams World:

Noble Deeds of the World's Heroines Henry Charles Moore, 2019-12-13 In *Noble Deeds of the World's Heroines* Henry Charles Moore presents a compelling anthology that highlights the remarkable contributions of women throughout history. With a meticulous narrative style infused with eloquence, Moore delves into the lives of extraordinary female figures who defied societal norms and demonstrated resilience, courage, and unwavering conviction. This work not only serves as an informative account of various heroines but also contextualizes their actions within the larger framework of historical movements and cultural development, illuminating the critical roles women have played in shaping the world. **The Promise of Pragmatism** John Patrick Diggins, 1995-05-15 For much of our century, pragmatism has enjoyed a charmed life, holding the dominant point of view in American politics, law, education, and social thought in general. After suffering a brief eclipse in the post-World War II period, pragmatism has enjoyed a revival, especially in literary theory and such areas as poststructuralism and deconstruction. In this sweeping critique of pragmatism and neopragmatism, one of our leading intellectual historians traces the attempts of thinkers from William James to Richard Rorty to find a response to the crisis of modernism. John Patrick Diggins analyzes the limitations of pragmatism from a historical perspective and dares to ask whether America's one original contribution to the world of philosophy has actually fulfilled its promise. In the late nineteenth century, intellectuals felt themselves in the grips of a spiritual crisis. This confrontation with the acids of modernity eroded older faiths and led to a sense that life would continue in the awareness of absences: knowledge without truth, power without authority, society without spirit, self without identity, politics without virtue, existence without purpose, history without meaning. In Europe, Friedrich Nietzsche and Max Weber faced a world in which God was dead and society was succumbing to structures of power and domination. In America, Henry Adams resigned from Harvard when he realized there were no truths to be taught and when he could only conclude: Experience ceases to educate. To the American philosophers of pragmatism, it was experience that provided the basis on which new methods of knowing could replace older ideas of truth. Diggins examines how, in different ways, William James, Charles Peirce, John Dewey, George H. Mead, and Oliver Wendell Holmes Jr. demonstrated that modernism posed no obstacle in fields such as science, education, religion, law, politics, and diplomacy. Diggins also examines the work of the neopragmatists Jürgen Habermas and Richard Rorty and their attempt to resolve the crisis of postmodernism. Using one author to interrogate another, Diggins brilliantly allows the ideas to speak to our conditions as well as theirs. Did the older philosophers succeed in fulfilling the promises of pragmatism? Can the neopragmatists write their way out of what they have thought themselves into? And does America need philosophers to tell us that we do not need foundational truths when the Founders already told us that the Constitution would be a machine that would depend more upon the counterpoise of power than on the claims of knowledge? Diggins addresses these and other essential questions in this magisterial account of twentieth-century intellectual life. It should be read by everyone concerned.

In a New Light Abigail Harrison Moore, R.W. Sandwell, 2021-07-15 In the early 1970s a German study estimated that women expended as many calories cleaning their coal mining husbands work clothes as their husbands did working below ground arguably making the home as much a site of industrialized work as factories and mines But while energy studies are beginning to acknowledge the importance of social and historical contexts and to produce more inclusive histories of the unprecedented energy transitions that powered industrialization women have remained notably absent from these accounts In a New Light explores the vital place of women in the shift to fossil fuels that spurred the Industrial Revolution illuminating the variety of ways in which gender and energy intersected in women s lives in nineteenth and

twentieth century Europe and North America From their labour in the home where they managed the adoption of new energy sources to their work as educators in electrical housecraft and their protests against the effects of industrialization women took on active roles to influence energy decisions Together these essays deepen our understanding of the significance of gender in the history of energy and of energy transitions in the history of women and gender By foregrounding women s energetic labours and concerns the authors shed new light on energy use in the past and provide important insights as societies move towards a carbon neutral future
