Burbules, 2012-07-01 The latest book in the Philosophy Theory and Educational Research series introduces the main philosophical and theoretical ideas of recent western feminisms as it applies to educational research Unlike other books that focus on these topics the authors present a balanced overview of the issues instead of pushing a particular perspective

**Embodied Care** Maurice Hamington, 2010-10-01 Until now ethicists have said little about the body limiting their comments on it to remarks made in passing or at best devoting a chapter to the subject Embodied Care is the first work to argue for the body's centrality to care ethics doing so by analyzing our corporeality at the phenomenological level It develops the idea that our bodies are central to our morality paying particular attention to the ways we come to care for one another Hamington's argues that human bodies are built to care as a result embodiment must be recognized as a central factor in moral consideration He takes the reader on an exciting journey from modern care ethics to Merleau Ponty's philosophy of the body and then to Jane Addams's social activism and philosophy The ideas in Embodied Care do not lead to yet another competing theory of morality rather they progress through theory and case studies to suggest that no theory of morality can be complete without a full consideration of the body

**Science, Gender and the Exploitation of Animals in Britain Since 1945** Catherine Duxbury, 2021-09-30 This book offers an historical analysis of the culture of animal dependent science in Britain from 1945 to the present exploring key areas of animal experimentation such as warfare medical science and law from a

gendered perspective Questioning the nature of knowledge production in this area and how animal experimentation intersects with broader cultural norms and values concerning sex and gender it examines the impact of contemporary forms of capitalism on animal dependent science its historical trajectory and gendered configuration With close attention to the broad social context from the creation of the Welfare State and the loss of Empire to the emergence of neoliberalism in the 1980s and its present day omnipotent manifestation the author asks how animal experimentation and the use of nonhuman animals in specific areas of science is gendered and has implications for women Drawing on a variety of sociological philosophical feminist and historical theories and engaging with a wealth of primary and secondary materials of scientific research of the time *Science Gender and the Exploitation of Animals in Britain Since 1945* contends that there is a persistent gendered ideology of animal use which remains inscribed within the policies of the British neoliberal state As such it will appeal to scholars of sociology history and philosophy with interests in gender and the treatment of nonhuman animals

*Feminist Approaches To Bioethics* Rosemarie Putnam Tong, 2018-02-05 No other cluster of medical issues affects the genders as differently as those related to procreation contraception sterilization abortion artificial insemination in vitro fertilization surrogate motherhood and genetic screening Yet the moral diversity among feminists has led to political fragmentation foiling efforts to create policies that are likely to serve the interests of the largest possible number of women In this remarkable book Rosemarie Tong offers an approach to feminist bioethics that serves as a catalyst bringing together varied perspectives on choice control and connection Emphasizing the complexity of feminist debates she guides feminists toward consensus in thought cooperation in action and a world that would have no room for domination and subordination Tong fairly and comprehensively presents the traditions of both feminist and nonfeminist ethics and bioethics Although feminist approaches to bioethics derive many insights from nonfeminist ethics and bioethics Tong shows that their primary source of inspiration is feminist ethics leading feminist bioethicists to ask the so called woman question in order to raise women s consciousness about the systems structures and relationships that oppress them Feminist bioethicists are naturally committed to acting locally in the worlds of medicine and science But their different feminist voices must also be raised at the policy table in order to make gender equity a present reality rather than a mere future possibility Inability to define a plan that guarantees liberation for all women must not prevent feminists from offering a plan that promises to improve the welfare of many women Otherwise a perspective less appealing to women may fill the gap

*Feminist Theory and Literary Practice* Deborah L. Madsen, 2000-08-20 This book is an exploration of women s writing that focuses on the close links between literary texts and the theories that construct those texts as women s writing Each chapter deals with one of the issues or concepts that have engaged both authors and theorists rhetoric work consciousness nature class and race A detailed analysis shows how each concept has been used by feminists to construct a specific text in such a way that it is received as a work of women s writing particularly in American literature Using canonical texts from Charlotte Perkins

Gilman through Kate Chopin and Willa Cather to Alice Walker and Ann Beattie Madsen engages with the major debates within feminist studies Moving on from Showalter's groundbreaking work to broaden the trajectory of feminist concern this book is an accessible account of the varieties of feminist thought within the context of the key American texts **Political Theories of Decolonization** Margaret Kohn, Keally McBride, 2011-03-16 Political Theories of Decolonization provides an introduction to some of the seminal texts of postcolonial political theory The difficulty of founding a new regime is an important theme in political theory and the intellectual history of decolonization provides a rich albeit overlooked opportunity to explore it Many theorists have pointed out that the colonized subject was a divided subject This book argues that the postcolonial state was a divided state While postcolonial states were created through the struggle for independence they drew on both colonial institutions and reinvented pre colonial traditions Political Theories of Decolonization illuminates how many of the central themes of political theory such as land religion freedom law and sovereignty are imaginatively explored by postcolonial thinkers In doing so it provides readers access to texts that add to our understanding of contemporary political life and global political dynamics No Friend Like a Sister Jenny Neale, 2004 Publisher description

**Masculinities and Desire** Marek Wojtaszek, 2019-02-06 Masculinities and Desire considers the question of male subjectivity in relation to Deleuze and Guattari's theory of desire Western tradition has thought of desire from the vantage point of masculine subjectivity what happens when the order is reversed and desire speaks through masculinity Can masculinity be conceived beyond the gender binary and thus affirm its potential to transcend the patriarchal order In answer Masculinities and Desire calls for a radically new approach to traditional cultural criticism Contributing a critical male perspective the book sheds new light on the conceptual and ethical limits of established representational gender criticism Reflecting on masculinity with Deleuze the book explores what happens to the masculine subject in his becoming minoritarian and thus emerging as a work of desire Wojtaszek examines the confining representations of masculinity in realms long associated with men such as violence virulent psychosis metaphysical cannibalism and virtualization Inspired by Deleuze's appeal for immanence Wojtaszek argues that films including American Psycho Fight Club Becoming John Malkovich and The Matrix are adventures of deterritorialization that imaginatively tackle various masculinities affirming their creative resistance and reinvention of subjectivity Desire is revealed to be a powerful catalyst for escaping the regime of patriarchal representation
