Boyle, 2018 The prolific Margaret Cavendish 1623 1673 published books on natural philosophy as well as stories plays poems orations allegories and letters Her mature philosophical system offered a unique panpsychist theory of Nature as composed of a continuous non atomistic perceiving knowing matter In contrast to the dominant philosophical

thinking of her day Cavendish argued that all matter has free will and can choose whether or not to follow Nature's rules The Well Ordered Universe explores the development of Cavendish's natural philosophy from the atomism of her 1653 poems to the panpsychist materialism of her 1668 Grounds of Natural Philosophy Deborah Boyle argues that her natural philosophy her medical theories and her social and political philosophy are all informed by an underlying concern with order regularity and rule following This focus on order reveals interesting connections among apparently disparate elements of Cavendish's philosophical program including her views on gender on animals and the environment and on sickness and health Focusing on the role of order in Cavendish's philosophy also helps reveal key differences between her natural philosophy and her more conservative social and political philosophy Cavendish believed that humans' special desire for public recognition often leads to an unruly ambition causing humans to disrupt society in ways not seen in the rest of Nature Thus The Well Ordered Universe defends Cavendish as a royalist who endorsed absolute monarchy and a rigid social hierarchy for maintaining order in human society
