Human Rights Obligations of Non-State Actors Andrew Clapham, 2006-03-02 The threats to human rights posed by non state actors are of increasing concern Human rights activists increasingly address the activity of multinational corporations the policies of international organizations such as the World Bank and the World Trade Organization and international crimes committed by entities such as armed opposition groups and terrorists This book presents an approach to human rights that goes beyond the traditional focus on states and outlines the human rights obligations of non state actors Furthermore it addresses some of the ways in which these entities can be held legally accountable for their actions in various jurisdictions The political debate concerning the appropriateness of expanding human rights scrutiny to non state actors is discussed and dissected For some extending human rights into these spheres trivializes human rights and allows abusive governments to distract us from ongoing violations For others such an extension is essential if human rights are properly to address the current concerns of women and workers The main focus of the book however is on the legal obligations of non state actors The book discusses how developments in the fields of international responsibility and international criminal law have implications for building a framework for the human rights obligations of non state actors in international law In turn these international developments have drawn on the changing ways in which human rights are implemented in national law A selection of national jurisdictions including the United States South Africa and the United Kingdom are examined with regard to the application of human rights law to non state actors The book's final part includes suggestions with regard to understanding the parameters of the human rights obligations of non state actors Key to understanding the legal obligations of non state actors are concepts such as dignity and democracy While neither concept can unravel the dilemmas involved in the application of human rights law to non state actors a better understanding of the tensions surrounding these concepts can help us to understand what is at stake

Emerging Conflicts of Principle Thomas Kane, 2016-04-29 Debates over the ethics of war economic redistribution resource consumption and the rights and responsibilities associated with membership of a political community are just some of the major conflicts of principle identified by Thomas Kane which characterize world politics today According to the author debates such as these are being drawn towards increasingly polarized positions represented by strongly universalist and particularist moral and political ideologies such as cosmopolitanism and republicanism Kane analyzes each of these areas identifying that the potential for ideologically driven conflict will constitute the greatest challenge facing scholars and policy makers in the twenty first century

Henders, 2004-01-01 The notable contributors to Democratization and Identity introduce the experiences of East and Southeast Asia into the study of democratization in ethnically including religiously diverse societies This collection suggests that the risk of ethnicized conflict exclusion or hierarchy during democratization depends in large part on the nature of the ethnic identities and relations constituted during authoritarian rule This volume s theoretical breakthroughs and its country case studies shed light on the prospects for

ethnically inclusive and non hierarchical democratization across East and Southeast Asia and beyond **The Empty Place**

Teresa Hoskyns, 2014-07-17 In *The Empty Place Democracy and Public Space* Teresa Hoskyns explores the relationship of public space to democracy by relating different theories of democracy in political philosophy to spatial theory and spatial and political practice Establishing the theoretical basis for the study of public space Hoskyns examines the rise of representative democracy and investigates contemporary theories for the future of democracy focusing on the Chantal Mouffe's agonistic model and the civil society model of Jürgen Habermas She argues that these models of participatory democracy can co exist and are necessarily spatial The book then provides diverse perspectives on how the role of physical public space is articulated through three modes of participatory spatial practice The first focuses on issues of participation in architectural practice through a set of projects exploring the open spaces of a postwar housing estate in Euston The second examines the role of space in the construction of democratic identity through a feminist architecture art collective producing space through writing performance and events The third explores participatory political democratic practice through social forums at global European and city levels Hoskyns concludes that participatory democracy requires a conception of public space as the empty place allowing different models and practices of democracy to co exist Global California Abraham F.
