Feng Shui: Teaching About Science

and Pseudoscience Michael R. Matthews, 2019-07-18 This book provides a richly documented account of the historical cultural philosophical and practical dimensions of feng shui. It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims and that this examination provides opportunities for students to better learn about the key features of the nature of science, the demarcation of science and non science, the characteristics of pseudoscience and the engagement of science with culture and worldviews. The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal. Feng shui is a deeply entrenched three millennia old system of Asian beliefs and practices about nature, architecture, health and divination that has garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi, qi, the putative universal energy or life force that animates all existence, the cosmos, the solar system, the earth and human bodies. Harmonious living requires building in accord with local chi streams, good health requires replenishment and manipulation of internal chi flow and a beneficent afterlife is enhanced when buried in conformity with chi directions. Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai chi and qigong exercise and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists and all those concerned to understand science, culture and the science/culture nexus. Harvey Siegel, Philosophy University of Miami, USA. With great erudition and even greater fluidity of style, Matthews introduces us to this now world wide belief system. Michael Ruse, Philosophy, Florida State University, USA. The book is one of the best research works published on Feng Shui. Wang Youjun, Philosophy, Shanghai Normal University, China. The history is fascinating. The analysis makes an important contribution to science literature. James Alcock, Psychology, York University, Canada. This book provides an in depth study of Feng Shui in different periods, considering its philosophical, historical and educational dimensions, especially from a perspective of the demarcation problem between science and pseudoscience. Yao Dazhi, Chinese Academy of Sciences, China. *Asian Business*, 1994. **Chinese Community Leadership: Case Study Of Victoria In Canada** David Chuenyan Lai, 2010-04-21 This book presents an in depth research into 125 years of the history of the Chinese Consolidated Benevolent Association in City of Victoria as a case study of Chinese community leadership and operation of a Chinese government within a municipal government in Canada. It does not examine only one association in one city. Instead it provides an overview of the socio economic and political activities of the Chinese in Canada before the turn of the twentieth century, their relationship with Western communities and the Association's inter relationship with China and other parts of the world. The book also includes a history of the origins of 17 Chinese Benevolent Associations in other Chinese communities across Canada. Chinese Community Leadership is an essential Chinese reference for researchers on Chinese community leadership, power structure and international networking. *Far Eastern Economic Review*, 1998-10. Asia's premier business magazine. The magazine reports on politics, business, economics, technology and social and cultural issues throughout Asia.

with a particular emphasis on both Southeast Asia and China
