La Science Pour Tous Hervé Fischer, Jacques Kirouac, 2004 Ce document présente 14 acteurs importants de la culture scientifique qu'on trouve dans les médias les musées et les régions. Il témoigne du travail de ces acteurs et de leur engagement. Il analyse leurs méthodes techniques de veille et de créer leur mode d'intervention et les raisons de leurs succès. Il fait aussi un rappel historique de quelques initiatives qu'on trouve importantes.

Jean-Marc Carpentier, 1994 **Science Communication in the World** Bernard Schiele, Michel Claessens, Shunke Shi, 2012-04-05 This volume is aimed at all those who wonder about the mechanisms and effects of the disclosure of knowledge. Whether they have a professional interest in understanding these processes generally or they wish to conduct targeted investigations in the PCST field, it will be useful to anyone involved in science communication including researchers, academics, students, journalists, science museum staff, scientists, high public profiles and information officers in scientific institutions. **Communicating Science** Toss Gascoigne, Bernard Schiele, Joan Leach, Michelle Riedlinger, Luisa

Massarani, Bruce V. Lewenstein, Peter Broks, 2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research publications and conferences as well as to tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? *Communicating Science* describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

Guide de vulgarisation. Au-delà de la découverte scientifique Pascal Lapointe, 2009-01-06T00:00:00-05:00 Comment vulgariser? Comment faire en sorte que pour le lecteur ou le téléspectateur la science ne soit pas vue comme un corps extraterrestre mais bien comme une partie intégrante de notre société? Peut-on vulgariser même si on n'a pas étudié en science? Qu'est-ce que les blogues peuvent nous apprendre sur une communication des sciences réussie? Qu'est-ce que la vulgarisation? Comment poser les bonnes questions? Comment raturer un texte et comment le réécrire? Quelle est la place de la science dans les médias? Internet peut-il changer l'équilibre travers une démarche formelle tenant du cours et une série de réflexions sur ce que deviendra peut-être la vulgarisation au 21^e siècle? Ce livre propose une entrée en matière autant pour les scientifiques désireux d'élargir leurs horizons que pour les journalistes et les communicateurs.
