Ferrocement Water Tanks and Their Construction Simon B. Watt,1978 Describes how cylindrical water storage tanks of up to 150 cubic meter capacity can be built using wire reinforced cement mortar Covers design and planning costs standard recommended and alternative construction methods and other information Ferrocement Water Tanks and Their Construction S. B. Watt,1978 Concrete Repair, Rehabilitation and Retrofitting M. Alexander,H.-D. Beushausen,F. Dehn,P. Moyo,2006-01-01 The First International Conference on Concrete Repair Rehabilitation and Retrofitting ICCRRR 2005 was held in Cape Town South Africa in November 2005 The conference was a collaborative venture by researchers from the South African Research Programme in Concrete Materials based at the Universities of Cape Town and The Witwatersrand and The Construction Materials Section at Leipzig University in Germany The conference focused on appropriate repairing maintaining rehabilitating and if necessary retrofitting existing infrastructure with a view to extending its life and maximising its economic return Ferrocement P. Nedwell,R.N. Swamy,2010-02-25 Ferrocement is a versatile construction material with applications in low cost housing rehabilitation strengthening and repair of structures This book presents the latest developments in research and application of the material The Biogas/biofertilizer Business Handbook Michael Arnott,1984 *Water and Sanitation Technologies* Bradley D. Hanson,1985 **Ferro-cement Construction Panels** H. H. Haynes,G. S. Guthrie,1974 Ferrocement Water Tanks Felicity Lee,Daniel Coleman,2022-05-10 Learn how to design and build your own domestic sized water tank to collect store and use rainwater for your home and garden Save money with this low cost method of construction and reduce your water bills too The combination of cheap easily available materials margin for error suitability for amateurs and flexibility in terms of size and shape make ferrocement tanks an ideal choice for anyone looking for long term water security on a budget and they work well in all but the harshest environment With hands on experience the authors provide a detailed guide to enable confident and safe construction by anyone interested in building their own ferrocement tank Felicity and Lee share their reasons for choosing these tanks how they calculated their water needs and how they constructed and maintain the tanks that cater for all their needs With our weather patterns drastically shifting between drought and flood due to the changing climate it is vital to have reserves of water to rely on Felicity and Daniel self built their own house and included water tanks achieving water security for less than the cost of joining the local water network Whether you are creating your own off grid home or want to reduce your carbon footprint and reliance on mains water the ferrocement tank offers a simple achievable and robust DIY solution Ferrocement S. K. Kaushik,V. K. Gupta,1988 *MAINTENANCE, REPAIR & REHABILITATION AND MINOR WORKS OF BUILDINGS* P. C. VARGHESE,2014-04-04 The term Maintenance of a building refers to the work done for keeping an existing building in a condition where it can perform its intended functions Usually the buildings last only for 40 to 50 years in a good shape just because of regular inspection and maintenance that enable timely identification of deteriorated elements Overlooked

dilapidation inadequate maintenance and lack of repair works may lead to limited life span of a building This comprehensive book striving to focus on the maintenance repair rehabilitation and minor works of a building presents useful guidelines that acquaint the readers with the traditional as well as modern techniques for upkeep and repairing of buildings already constructed Dexterously organised into five parts this book in Part I deals with the maintenance of buildings Description of the construction chemicals concrete repair chemicals special materials used for repair and repair of various parts of a building is given in Part II Strengthening of reinforced concrete members by shoring underpinning plate bonding RC jacketing and FRP methods are explored in Part III which also highlights rebuilding of RC slabs and protection of earth slopes Part IV of the book exposes the reader to the minor works done in a building such as construction of compound walls gates waters sumps house garage relaying of floors joining two adjacent rooms and so on Part V is based on some allied topics involving control on termites and fungus in buildings as well as introduction of Vaastu Shastra and its main recommendations for a single house in a plot Using an engaging style this book will prove to be a must read for the undergraduate and postgraduate students of civil engineering as well as for the polytechnic and ITI diploma students Besides the book will also be of immense benefit to the technical professionals across the country **KEY FEATURES** The text displays several figures to make the concepts clear Chapter end references make the text suitable for further study Appendices at the end of the text provide extra information on non destructive field tests for survey of the condition of concrete buildings and rough estimation of the construction and maintenance costs of buildings

The Culture of Technology Arnold Pacey, 1985-09-10 The Culture of Technology examines our often conflicting attitudes toward nuclear weapons biological technologies pollution Third World development automation social medicine and industrial decline It disputes the common idea that technology is value free and shows that its development and use are conditioned by many factors political and cultural as well as economic and scientific Many examples from a variety of cultures are presented These range from the impact of snowmobiles in North America to the use of water pumps in rural India and from homemade toys in Africa to electricity generation in Britain all showing how the complex interaction of many influences in every community affects technological practice Arnold Pacey who lives near Oxford England has a degree in physics and has lectured on both the history of technology and technology policy with a particular focus on the development of technologies appropriate to Third World needs He is the author of The Maze of Ingenuity MIT Press paperback

Proceedings of the Fourth International Conference on Durability of Building Materials and Components

Gyoujin Cho, 2013-10-02 Proceedings of the Fourth International Conference on Durability of Building Materials and Components Volume I contains the proceedings of the Fourth International Conference on Durability of Building Materials and Components held in Singapore on November 4-6, 1987. The conference provided a forum for reviewing advances that have been made with regards to the durability of building materials and components and tackled topics ranging from concrete materials and structures to fiber reinforced concrete, plastics, surface coatings and building codes and specifications. Comprised of 67 chapters, this volume first summarizes the technical barriers to service life prediction and outlines research directions for overcoming such barriers. The discussion then turns to the deterioration of slate tiles containing iron sulfides, prediction of durability of building sealants and the durability of building ceramics in agricultural environments. Subsequent chapters focus on the influence of seawater curing on the pore structure of flyash blended cement mortar, effect of cement composition on the durability of natural fibers in mortar, permeability control of concrete protective layers in products and theory and experimental evidence concerning maximum and minimum strength of composite materials. The applications of surface integral techniques to fracture analysis are also considered. This book will be of interest to practitioners and research workers in engineering. **Peace Corps Times**, 1981

Designing with Alternative Building Materials and Review of Building Materials Kalyan Kumar Ganguly, 2025-06-02 This book explores alternative building materials and their test results. It includes a review of common building materials, earth engineering and construction, suitable soil types, soil mechanics and production masonry construction, rammed earth construction, the use of ferro cement units in projects and the application of fibre reinforced concrete. Other topics such as project management, computer aided design, education and training for engineers, construction work quality control, safety aspects, communication applications and case studies accompanied by construction photographs are covered in this book. Features: Focuses on alternative building materials and their applications in projects. Provides a useful overview of earth and concrete alternative construction materials. Comprehensively covers different types of fibre reinforced concrete. Explains relevant sustainability and environmental benefits. Includes a case study on carbon fibre composite material used for strengthening a column. This book is aimed at professionals in civil and construction engineering. **Steel-Concrete Composite Structures** R. Narayanan, 1988-12-31
