Fertility Family Planning And Population Control In China:

Fertility, Family Planning and Population Policy in China Chiung-Fang Chang, Che-Fu Lee, Sherry L. McKibben, Dudley L. Poston, Carol S. Walther, 2005-12-16 China's one child population policy first initiated in 1979 has had an enormous effect on the country's development. By reducing its fertility in the past two decades to less than two children per woman and developing a family planning program focused heavily on sterilization and abortion, China has undergone a significant transition in status to a demographically developed country. Bringing together contributions from leading academics, this book looks at the impact of the government's strict control over planning and population growth on the family, the wider society, and the country's demography. The contributors examine developments such as family planning policy and contraceptive use, biological and social determinants of fertility patterns, of family and marriage, and China's future population trends. As such, it will be essential reading for academics, researchers, policy makers, and government officials with an interest in China's population policy.

International bibliography of research in marriage and the family

Joan Aldous, 1967 Economic Reforms and Fertility Behaviour Weiguo Zhang, 2013-12-19 Based on an intensive fieldwork in a southern Hebei village in northern China 1992-3 the author takes an institutional approach and focuses on the way deliberate Chinese state policies driven by new economic and social agendas since the late 1970s have impacted on marriage family relations and consequently on the way fertility trends have been adversely affected the study is also very much concerned with the human dimension and the way in which such social and economic changes are perceived and applied in a rural community The research presented in this study goes a long way to unravelling the puzzle concerning the reasons for a very rapid decline in Chinese fertility rates contrasting sharply with a very different fertility transition within western cultures

Handbook on the Family and Marriage in China Xiaowei Zang, Lucy Xia Zhao, 2017-12-29 This Handbook advances research on the family and marriage in China by providing readers with a multidisciplinary and multifaceted coverage of major issues in one single volume It addresses the major conceptual theoretical and methodological issues of marriage and family in China and offers critical reflections on both the history and likely progression of the field

Population in China Nancy E. Riley, 2016-12-16 China is home to a fifth of the world's inhabitants For the last several decades this huge population has been in flux fertility has fallen sharply mortality has declined and massive rural to urban migration is taking place The state has played a direct role in these changes seeing population control as an important part of its intention to modernize the country In this insightful new work

Nancy E Riley argues that China's population policies and outcomes are not simply imposed by the state onto an unresponsive citizenry but have arisen from the social organization of China over the past sixty years. Riley demonstrates how China's population and population policy are intertwined and interact with other social and economic features. Riley also examines the unintended consequences of state directives including the extraordinary number of missing girls, the rapid aging of the population, and an increase in inequality particularly between rural and urban residents. Ultimately, China's demographic story has to be understood as a complex, multi-pieced phenomenon. This book will be essential reading for researchers and students of China and social demography as well as non-specialists interested in the changing nature of China's population. **Area**

Administration in China Xiaowei Zang, Hon S. Chan, 2020-11-27. This Handbook offers a critical analysis of the major theoretical and empirical issues in public policy and public administration in China. Investigating methodological, theoretical, and conceptual themes, it provides an insightful reflection on how China is governed. **Gender Policy and HIV in China**

Joseph Tucker, Dudley L. Poston, Jr., Qiang Ren, Baochang Gu, Xiaoying Zheng, Stephanie Wang, Chris Russell, 2009-05-08. China's concentrated HIV epidemic is on the brink of becoming a generalized one, and syphilis infection has become a major public health threat. Social factors relating to gender and gender inequality exacerbate the spread of HIV and sexually transmitted infections (STI) in China. A better understanding of the proximate social determinants of HIV related to gender will be crucial to effectively curbing HIV and other STIs in China. Aspects of China's governance including administrative procedures, the developing legal system, social institutions, and the public health infrastructure are instrumental in shaping strategies and responses to HIV. International studies suggest that women who are more economically and socially vulnerable may also have a greater risk of HIV infection, yet few initiatives have focused on discrete areas where achievable and sustainable gender policy measures could be linked to the public health response. This study presents perspectives ranging from criminology to social psychology to better understand how gender perspectives can inform HIV policy in the context of China. **China's Experience in Population Control: the Elusive Model** United States. Congress. House. Foreign Affairs Committee, 1974.

An Essay on China's Development After the Demographic Golden Age Xueyuan Tian, 2023-03-17. This book mainly

addresses China's current demographic situation and social people related policies. It aims to solve the issues of demographic transition, population aging, population flow, urbanization, population quality, etc. China is the first large population country with the vast territory and the huge economic system. It has many issues such as productivity and production relations, superstructure and economic base, and domestic and international relations in various fields and at all levels. Hence China needs to come up with a set of overall strategies. The author sorts out all of his works in recent years and performs his new academic achievements on demographic issues and social governing strategies. This timely book offers new methods that impact advanced social development with real data.
