Festivals and the City Andrew Smith, Guy Osborn, Bernadette Quinn, 2022-08-23 This book explores how festivals and events affect urban places and public spaces with a particular focus on their role in fostering inclusion The festivalisation of culture politics and space in cities is often regarded as problematic but this book examines the positive and negative ways that festivals affect cities by examining festive spaces as contested spaces The book focuses on Western European cities a particularly interesting context given the social and cultural pressures associated with high levels of in migration and concerns over the commercialisation and privatisation of public spaces The key themes of this book are the quest for more inclusive urban spaces and the contested geographies of festival spaces and places Festivals are often used by municipal authorities to break down symbolic barriers that restrict who uses public spaces and what those spaces are used for However the rise of commercial festivals and ticketed events means that they are also responsible for imposing physical

and financial obstacles that reduce the accessibility of city parks streets and squares Alongside addressing the contested effects of urban festivals on the character and inclusivity of public spaces the book addresses more general themes including the role of festivals in culture led regeneration Several chapters analyse festivals and events as economic development tools and the book also covers contested representations of festival cities and the ways related images and stories are used in place marketing A range of cases from Western Europe are used to explore these issues including chapters on some of the world s most significant and contested festival cities Venice Edinburgh London and Barcelona The book covers a wide range of festivals including those dedicated to music and the arts but also events celebrating particular histories identities and pastimes A series of fascinating cases are discussed from the Venice Biennale and Dublin Festival of History to Rotterdam s music festivals and craft beer festivals in Manchester The diverse and innovative qualities of the book are also evident in the range of urban spaces covered obvious examples of public spaces such as parks streets squares and piazzas are addressed but the book includes chapters on enclosed public spaces e g libraries and urban blue spaces waterways too This reflects the interpretation of public spaces as socio material entities they are produced informally through their use including for festivals and events as well as through their formal design and management

Festivals in Latin Literature Anke Walter, 2025-04-26 Festivals feature prominently in Latin literature even in works that are not explicitly dedicated to festive days like Ovid s Fasti Festivals in Latin Literature explores the role of festivals in elegiac lyric and epic poetry as well as historiography In all of these festivals play a more pervasive role than has so far been realised Tibullus elegiac oeuvre rests on an interplay between amatory and festive poetics that even has a political meaning to it and Propertius uses festivals in his fourth book of elegies to question from an amatory perspective the memory typically associated with some key Roman festivals In the poetry of Sulpicia and Ovid s Tristia festivals allow voices that are otherwise marginalised to shape their own fame and commemoration Horace s Odes and the Carmen saeculare rest on an intriguing interplay of festivity in the private sphere which forms but a fleeting and precious moment and the monumentality of public festivals in which the poet styles himself as a master of Roman time Post Vergilian Latin epicists use festivals to explore the fragility of human identity in a world dominated by the gods in Ovid s Metamorphoses and to question further the commemoration connected with festive days In particular Statius in his Thebaid undermines the foundational importance of festivals in the Aeneid vividly staging the problematic meaning of festivals that convey a premature commemoration of an epic conflict that is unspeakable nefas Finally in Livy s ab urbe condita and Tacitus Histories festivals both provide structure and capture long term developments in Roman history including Rome s rise to power and the collapse of its morals while

situating both works in broader historiographical and intertextual dialogues The book sheds new light on these authors and works uncovering their unique festive poetics It demonstrates that Latin literature adds important new aspects to our general understanding of festivals which as seen throughout the book offer even richer avenues of creating meaning and shaping or questioning commemoration than is often assumed
