Old Books and Digital Publishing: Eighteenth-Century Collections Online Stephen H. Gregg, 2021-01-28 This is a history of Eighteenth Century Collections Online a database of over 180 000 titles Published by Gale in 2003 it has had an enormous impact on the study of the eighteenth century Like many commercial digital archives ECCO's continuing development obscures its precedents This Element examines its prehistory as first a computer catalogue of eighteenth century print and then as a commercial microfilm collection before moving to the digitisation and development of the interfaces to ECCO as well as Gale's various partnerships and licensing deals An essential aspect of this Element is how it explores the socio-cultural and technological debates around the access to old books from the 1930s to the present day Stephen Gregg demonstrates how these contexts powerfully shape the way ECCO works to this day The Element's aim is to make us better users and better readers of digital archives This title is available as Open Access on Cambridge Core

Authors and Apparatus Monika Dommann, 2019-03-15 Copyright is under siege From file sharing to vast library scanning projects new technologies actors and attitudes toward intellectual property threaten the value of creative work However while digital media and the Internet have made making and sharing perfect copies of original works almost effortless debates about protecting authors rights are nothing new In this sweeping account of the evolution of copyright law since the mid nineteenth century Monika Dommann explores how radical media changes from sheet music and phonographs to photocopiers and networked information systems have challenged and transformed legal and cultural concept of authors rights Dommann provides a critical transatlantic perspective on developments in copyright law and mechanical reproduction of words and music charting how artists media companies and lawmakers in the United States and western Europe approached the complex tangle of technological innovation intellectual property and consumer interests From the seemingly innocuous music box invented around 1800 to BASF's magnetic tapes and Xerox machines she demonstrates how copyright has been continuously destabilized by emerging technologies requiring new legal norms to regulate commercial and private copying practices Without minimizing digital media's radical disruption to notions of intellectual property Dommann uncovers the deep historical roots of the conflict between copyright and media a story that can inform present day debates over the legal protection of authorship
