Handbook of Teaching and Learning at Business Schools Thomsen, Thyra U., Lindgreen, Adam, Kjærgaard, Annemette, Rosier, Eleri, 2021-11-19 This timely Handbook investigates the many perspectives from which to reconsider teaching and learning within business schools during a time in which higher education is facing challenges to the way teaching might be delivered in the future Business School Leadership and Crisis Exit Planning Eric Cornuel, 2022-05-19 The European Foundation for Management Development EFMD is the largest international accreditation body for business schools with more than 950 members across 92 countries including the world's highest ranked schools A not for profit mission led institution the EFMD plays a central role in shaping a global approach to management education emphasizing the development of socially responsible leaders As part of EFMD's fiftieth anniversary celebrations its President Professor Eric Cornuel has edited this volume featuring contributions from leaders in management education including the presidents and deans of the top business schools from across the world Each contribution will address the challenges and dilemmas facing business schools today with respect to four key themes the higher purpose of business schools the social impact of business schools the internationalization of business schools and crisis management within business schools with a special focus on the impact of COVID 19 This volume is also available via Open Access Teaching Business Sustainability Chris Galea, 2017-11-28 In a world where corporate governance scandals have become the everyday the role of business schools in producing the managers of today and tomorrow has come into sharp focus Today's managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum As some but by no means all organisations are coming to realise bad performance in environmental protection labour practices and human rights is no longer a soft issue but one that can hit the bottom line with a vengeance So what is

the state of the art in teaching business sustainability worldwide and what teaching practices and tools are achieving successful results This book begins to answer these questions and more There are many challenges facing educators in the field of sustainability It is an evolving field still in its infancy as a management discipline and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non valued added effort Teaching Business Sustainability acknowledges this problem while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value added practical outcomes A wide mix of approaches is therefore indicated while many of these are experimental and on the leading edge of management learning they all share an experiential and often a team based element and attempt to bring together the theory in a way that makes it relevant to practitioners in the field The implication is that whenever possible educators need to link the learning to the students immediate and pressing real world realities This applies equally to undergraduates or high level executives However in the absence of immediate examples of such realities as may often be the case in undergraduate settings educators need to introduce experientially based approaches that recreate such settings in the classroom The book also argues the case for holistic and interdisciplinary learning It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business Indeed it goes beyond just business learning to encompass many fields such as ecology engineering and biology If students are to move beyond the narrow perspective that conventional business studies often entail they need to be introduced to the wider vision that an interdisciplinary approach engenders The final point that emerges from this collection is that experiential learning of business sustainability often can and should be fun Be it a heated exchange in a case study discussion a role play exercise or a hands on student consulting project much experiential learning seems to excite the imagination of the students and to release their creative juices The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups In the first section Theory Critique and Ideas the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability The next section Learning from Current Practice contains the experiences of a number of educators and the successful and leading edge approaches that they have used The final section then outlines tools methods and approaches that can be used to teach business sustainability This last section also serves as an introduction to a second volume Teaching Business Sustainability Vol 2 which provides educators of sustainability with a series of case studies role plays and experiential exercises Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines looking for inspiration and guidance on how to teach business sustainability as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues

Teaching in the Global Business Classroom Carol Dalglish,Peter Evans,2010-01-01 This book is an excellent resource

for university lecturers facing the challenges of working in multicultural classrooms as it examines all aspects raised from the different perspectives of the stakeholders This book adds both research and practical examples to an already established approach to learning both in schools and universities Whilst aimed at university business lecturers secondary teachers and trainee teachers would also gain from the reflection of the impact of international students in relation to teaching and learning Carole Marshall Professional Development in Education The text is succinct easy to follow and broken up with helpful subtitles this book is recommended for all new higher education teachers and demonstrators and as a resource for both lecturer training and for continuing professional development purposes Barbara Chandler Studies in Higher Education One of the great challenges for teachers in many tertiary institutions is to effectively understand the complex multicultural classroom both as a consequence of increasing international student mobility and as a result of the raised cultural diversity of domestic populations Even more important is the need to devise practical and effective strategies that aid learning in growing international contexts Carol Dalglish and Peter Evans in Teaching in the Global Business Classroom provide both and have written an excellent and invaluable guide that will help to avoid the mono culturalism and Anglo Americanism of many current approaches which act as barriers both to more effective learning and enhanced performance in the global business environment Roger King Open University and formerly of University of Lincoln UK Dalglish and Evans text Teaching in the Global Business Classroom draws our attention to the possibilities of enriching the experience of the global business classroom for all parties The contributors to the volume achieve this ambitious aim by delivering a highly accessible text which offers a useful guide for teachers of global business classrooms I certainly would like to have read this book in my early years of teaching as the volume provides a much needed injection of accessibility and evidence based recommendations and practical suggestions to a literature which has so far remained anaemic in these regards Mustafa zbilgin University of East Anglia UK The rise in international student numbers means that teachers face unique challenges arising from language and cultural differences in understanding Teaching in the Global Business Classroom presents an educational framework for effective teaching and learning in the global classroom It provides practical tools for teachers through suggestions for innovative curriculum design lecture techniques group work and participation activities as well as the use of case studies and assessment methods This book is an essential resource for teachers and lecturers looking to provide the best possible teaching experience for their students but who may be unsure how to address the issues raised by the rise in ethnic diversity It will also be of great interest to student teachers at both undergraduate and postgraduate levels Rethinking Undergraduate Business Education Anne Colby, Thomas Ehrlich, William M. Sullivan, Jonathan R. Dolle, 2011-04-20 Business is the largest undergraduate major in the United States and still growing This reality along with the immense power of the business sector and its significance for national and global well being makes quality education critical not only for the students themselves but also for the public good The Carnegie Foundation for the Advancement of Teaching s national study

of undergraduate business education found that most undergraduate programs are too narrow failing to challenge students to question assumptions think creatively or understand the place of business in larger institutional contexts Rethinking Undergraduate Business Education examines these limitations and describes the efforts of a diverse set of institutions to address them by integrating the best elements of liberal arts learning with business curriculum to help students develop wise ethically grounded professional judgment **The Journal of Business Education** ,1929 **The Eastern Business Teachers Association Yearbook** Eastern Business Teachers Association,1929
