Expanding the Boundaries of Transformative Learning E. O'Sullivan,A. Morrell,M. O'Connor,2016-04-30 Transformative learning involves experiencing a deep structural shift in the basic premises of thought feelings and actions It is a shift of consciousness that dramatically and permanently alters our way of being in the world Such a shift involves our understanding of ourselves and our self locations our relationships with other humans and with the natural world our understanding of relations of power in interlocking structures of class race and gender our body awarenesses our visions of alternative approaches to living and our sense of possibilities for social justice and peace and personal joy The editors of this collection make several challenges to the existing field of transformative learning the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning The editors argue that transformative learning theory cannot be constructed in a content neutral or context free way Their second challenge which assumes the importance content for transformative learning is to educators as practitioners The editors argue that transformative learning requires new educational practices consistent with the content Arts based research and arts based teaching learning practices are one example of such new educational practices Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples forms of teaching learning is another example Each article in the collection presents a possible model of these new practices

Sustainable Development and Learning William Scott,Stephen Gough,2003 This book examines the difficult and wide ranging issues relating to how we understand our environment our place in it and how we choose to act This comprehensive text provides an overview of these developing key issues illustrating how through schooling higher education professional training and development and awareness raising people can bring about change as well as engaging in debate and critique of issues The book builds on existing work across a number of fields as well as on original international research in order to model the complexity of the problems the institutional contexts in which they arise and the interrelationships between these Areas explored include the policy context the links between sustainable development and learning the economic and moral interdependence of humans and nature the management assessment and evaluation of learning and globalisation The book suggests ways in which those responsible for learning can target their efforts appropriately matching straightforward solutions to simple problems and designing complex interventions only where

these are needed This text will be a valuable resource for anyone studying Masters degrees and MBAs that focus on environment or sustainable development and for professionals dealing with problems on a day to day basis Though a free standing text its analysis is supported by a companion reader Key Issues in Sustainable Development and Learning a critical review

Sustainable Development and Learning: Framing the Issues Stephen Gough, William Scott, 2003-12-16 In this important new book the authors explore the role of learning in sustainable development The book sets out the key issues and raises concepts for discussion reflection and ongoing consideration by all stakeholders in this crucial field Rethinking Environmental Education in a Climate Change Era Tonya Rooney, Mindy Blaise, 2022-12-23 As the impact of climate change has become harder to ignore it has become increasingly evident that children will inherit futures where climate challenges require new ways of thinking about how humans can live better with the world This book re situates weather in early childhood education examining people as inherently a part of and affected by nature and challenges the positioning of humans at the centre of progress and decision making Exploring the ways children can learn with weather this book for researchers and advanced students works with the pedagogical potential in children s relations with weather as a vital way of connecting with and responding to wider climate concerns
