The Educational Imperative Peter Abbs,2013-05-13 Written with both the cultural and moral crisis and the challenge of the future in mind Peter Abbs s book charts an open clear and positive way forward for education Divided into four sections the first examines the true and fitting ends of education and outlines a positive conception of education as an initiation into critical enquiry and the personal art of learning The two middle sections consider aesthetic education Abbs confronts government approaches to arts teaching and offers an alternative dynamic paradigm within which the creativity of the culture transmitted down the ages and the creativity of the individual seen as biologically given must be combined The outcome of this is explored in detail in relation to the teaching of literature creative writing and drama The final section offers critical appraisals of influential figures in the arts field Herbert Reid the late Peter Fuller and David Holbrook

Against the Flow Peter Abbs,2003-09-02 At once provocative and inspiring Against the Flow is a work of polemic from an internationally respected writer and thinker on arts education Peter Abbs argues that contemporary education ignores the aesthetic and ethical as a result of being in thrall to such forces as the market economy and managerial and functional dictates He identifies the present education system as being inimical to creativity and authentic

learning and instead narrowly focused on the quantitative measuring of results This absence of a creative and ethical dimension in education has implications for art making in wider society Art is shown as emerging from and appealing to the ironic postmodernist sensibility and mass media led culture while being devoid of philosophical significance This book opens up a fresh and timely debate about the vital power of creativity in modern education Drawing on examples from modern poetry literature and visual art it is an eloquent and passionate argument for the need to develop ethical and aesthetic energies to confront the growing vacuity of contemporary culture

Practice Helen Bradbury, Nick Frost, Sue Kilminster, Miriam Zukas, 2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual's internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices **Beyond Reflective Practice** examines what new forms of professional reflective practice are emerging It examines in particular the relationships between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts **Wise Up** Guy Claxton, 2001-06-01 From the author of the bestselling *Hare Brain Tortoise Mind* comes a breakthrough book on the future of learning The new sciences of brain and mind are revealing that everyone

has the capacity to become a powerful lifelong learner We can all learn how to learn it has little to do with conventional intelligence or educational success Guy Claxton teaches us how to raise children who are curious and confident explorers and how we ourselves can learn to pair problem solving with creativity *Wise Up* is essential and compelling reading for parents educators and managers alike Guy Claxton is Visiting Professor in Psychology and Education and Director of the Research Programme on Culture and Learning in Organisations CLIO at the University of Bristol He is the author of thirteen published books **What Should Schools Teach?** Alka Sehgal Cuthbert, Alex Standis, 2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society It is a serious

responsibility that raises a number of questions What is knowledge for What knowledge is important for children to learn How do we decide what knowledge matters in each school subject And how far should the knowledge we teach in school be related to academic disciplinary knowledge These and many other questions are taken up in What Should Schools Teach The blurring of distinctions between pedagogy and curriculum and between experience and knowledge has served up a confusing message for teachers about the part that each plays in the education of children Schools teach through subjects but there is little consensus about what constitutes a subject and what they are for This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge what to teach and their own pedagogy how to teach and how both need to be informed by values of intellectual freedom and autonomy This second edition includes new chapters on Chemistry Drama Music and Religious Education and an updated chapter on Biology A revised introduction reflects on emerging discourse around decolonizing the curriculum and on the relationship between the knowledge that children encounter at school and in their homes

Narrative Matters Dr Grant Bage, Grant Bage, 2012-10-02 In recent years there has been a massive revival of interest internationally in what story can offer to education This book covers a range of issues at the heart of teaching history such as the use of talk the pitfalls of narrative as a pedagogical tool translating curriculum content into lessons story telling and story making It also questions what it means to teach the difficulties for teachers of remaining constructively critical of policy and their own practice during periods of national legislation and change

The Future of Teaching Guy Claxton, 2021-04-28 It s time for the educational slugfest to stop Traditional and progressive education are both caricatures and bashing cartoon images of each other is unprofitable and unedifying The search for a new model of education one that is genuinely empowering for all young people is serious and necessary Some good progress has already been made but teachers and school leaders are being held back by specious beliefs false oppositions and the limited thinking of orthodoxy Drawing on recent experience in England North America and Australasia but applicable round the world The Future of Teaching clears away this logjam of bad science and slack thinking and frees up the stream of much needed innovation This timely book aims to banish arguments based on false claims about the brain and poor understanding of

cognitive science reclaim the nuanced middle ground of teaching that develops both rigorous knowledge and character and lay the foundations for a 21st century education worthy of the name

Changing Educational Landscapes Dimitris Mattheou, 2010-04-08 Analyzing educational landscapes the fundamental values principles and institutions of the sector is a highly complex and demanding task for any researcher Like shifting desert sands these aspects of education are in a constant state of flux changing according to the unpredictable economic social cultural and geo political circumstances of late modernity Key aspects of the intricate fluid and multifarious contemporary setting can always escape the researcher s necessarily selective observation The contributors to this book share the view that it is wise therefore to take note of other people s ideas perceptions and perspectives to compare notes and reflect critically on them Thus the papers presented here are a critical and comparative analysis of today s changing educational landscapes They are an exploration of some of the forces and factors that induce these changes and also examine some of their most significant implications The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies Among other things the book discusses the obsession with quality in education and the alternative perceptions of educational equality the rising concern at the obstacles to truly multicultural education and the debate about the epistemological foundations both of knowledge and knowledge production Underlying all of the papers in the book is the authors intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world

A Century of Change in Music Education Stephanie Pitts, 2019-01-04 Published in 2000 Education in our schools is a constant feature of media headlines often blamed for many of society s ills Perceived throughout the ages as civilizing force music has a fundamental role to play in education yet the last twenty years have seen a consistent erosion of the time and money made available to music teachers in our schools This book is a timely reminder of how we have arrived at the current debates and challenges of music education Stephanie Pitts charts the history of music teaching in British secondary schools over the course of the twentieth century Each chapter looks at a significant period of music education history in which the ideas and practices of a generation were established and refined The main educational publications of each decade are examined from the early by MacPherson Somervell and Yorke Trotter to the more recent thinking of Paynter and Swanwick The shifting perceptions of music in the school curriculum are nowhere better highlighted than in the changing focus on children s engagement with music from the musical appreciation lessons of the 1920 s and 1930 s to the post war concentration on performance and the 1970 s emphasis on improvisation and composition There and many other trends are discussed in the book allowing today s music educators to see their own practice in its historical context
