America Europe and Australia demonstrate how school leadership is influenced by global pressures differing national and state contexts and local concerns They illustrate the limitations of reform initiatives which focus on school leaders to the exclusion of the many other organisations which affect school such as national and local governments professional associations and school communities This book raises some important questions such as How can school leaders create intelligent thinking schools How can leadership and learning be linked together What are the characteristics of effective local education authorities and school districts What is the role of teacher organisations in educational reform and change What happens if businesses teachers parents and local communities have different views of what makes a good school The text illustrates the ways in which leadership is rooted in learning and identifies new directions for school leadership It challenges conventional notions of leadership offering an expanded view which sees leadership just as an individual role based function but as a network of relationships among people structures and cultures This lively and provocative book should be read by all those interested in education reform

**Leadership - International Perspectives** Stephan Huber, 2009-12-24 Recent research into school effectiveness has corroborated the theory that the school leader plays a pivotal role making their school a successful institution and is most often cited as the key factor in a school's development. Reflecting the importance it is given in today's education landscape, this book explores the latest trends in school leadership from both theoretical and practical perspectives. Each chapter provides insight into an aspect of current research with detailed case studies coming from as far afield as Hong Kong and Canada. In the context of the ever-increasing burden of responsibility placed on education management to safeguard and enhance the quality of education, they provide school leadership is now a core concern of policy makers. In addition, most countries are undertaking fundamental education reforms that will have a major influence on the nature of school leadership. Offering the most up-to-date research on this central issue, this book will both inform and shape the debate. *Second International Handbook of Educational Leadership and Administration* Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first *International Handbook of Educational Leadership and Administration* Leithwood et al. was published in 1996 and quickly became something of a best seller for reference works within education. Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research, although there is a romance with leadership as an explanation for success in many non-school enterprises as well. During the two-year period during which this current handbook was being written, activity in the realms of school leadership, school improvement and leadership development gained further momentum. The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection, preparation and development. **School Leadership and Administration** Allan Walker, Clive Dimmock, 2012-11-12 This text calls for a broader approach to comparative educational administration, one which uses culture as the principle means of analysis. The articles collected by Allan Walker and Clive Dimmock detail the educational practices and outcomes of other systems while taking into account the mediating influence of culture. In this way, these essays stress the specific aspects of the cultures studied and map out common ground for the study of administrators' values, beliefs and actions. **Reshaping the Landscape of School Leadership Development** Philip Hallinger, 2003-01-01 *Reshaping the Landscape of School Leadership Development: A Global Perspective* traces developments in this arena as they evolved since 1980. The book is comprised of chapters authored by the leading scholars in the fields of educational leadership and school leadership development from the United States, Canada, Europe, Asia and Australia.
