An Educator's Guide to Electronic Networking Barbara L. Kurshan, Marcia A. Wanamaker Harrington, Peter G. Milbury, 1994 [An Educator's Guide to Electronic Networking](#) Barbara L. Kurshan, Marcia Harrington, Peter G. Milbury, 1994 Provides a framework for educators to help think about choose create design an electronically networked community Helps planners designers to answer four basic questions 1 What type of networked community do I want to create 2 What factors do I need to consider in selecting an electronic network to support this community 3 What network projects exist already that provide the best resources to meet the community s needs 4 How can the members of the community gain access to the network Glossary Bibliography Charts tables *Resources in Education* ,2001-04 *Collaborative Learning in a Global World* Miri Shonfeld, David Gibson, 2018-11-01 The 21st century has brought about changes in every aspect of life through ubiquitous technology and Internet based social media The distances between cultures and continents have narrowed the world has become flat and multicultural work teams composed of members from different countries have become a daily reality in global businesses However in many ways these global changes in work practices have only just begun to have an impact on education To better prepare students for the information age researchers and policy makers largely agree about the skills needed for shared knowledge construction Indeed the education systems in several different countries have begun to integrate these skills into teaching and learning and are placing a strong emphasis on their implementation Melamed et al 2010 Resta et al 2011 In 2015 the OECD PISA exam for the first time included assessment of collaborative problem solving in its country by country comparison Collaborative learning is not a trivial challenge nor is it intuitive for all teachers and learners One must acquire and practice the essential skills in order to successfully work in a team Consequently it is essential to train teachers in collaborative teamwork as they must serve as role models for students In addition new tools and practices become available at a rate that outpaces the abilities of many higher education institutions to adopt and implement This book surveys the current state of the field and provides theoretical guidance and practical examples to help meet the gaps in research development and practice *Recent Department of Education Publications in ERIC* United States.
