Exceptional Children Ronald L. Taylor, Les Sternberg, 2012-12-06 Exceptional Children Integrating Research and Teaching provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of Exceptional Children Integrating Research and Teaching that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of Exceptional Children Integrating Research and Teaching that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs Academic Instruction for Students With Moderate and Severe Intellectual Disabilities in Inclusive Classrooms June Downing, 2010-03-09 While most resources for inclusive education focus on teaching students with mild to moderate disabilities teachers of students with more severe disabilities need specific methods to provide the individualized and systematic instruction necessary to support students in inclusive environments This unique book meets that need with approaches information and ideas for teachers of students with moderate to severe disabilities in general education classrooms June E Downing draws from a strong research base to provide practical instructional strategies plus suggestions based on personal experience Featuring tables and figures chapter

Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States by law and by custom However it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization grouping assessment placement funding instruction and a variety of legal issues The purpose of this 13 part 57 chapter handbook is to help profile and bring greater clarity to this sprawling and growing field To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research Key features include Comprehensive Coverage Fifty seven chapters cover all aspects of special education in the United States including cultural and international comparisons Issues Trends In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research chapter authors discuss issues related to practice and reflect on trends in thinking Categorical Chapters In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV chapter authors were asked to follow a consistent outline Definition Causal Factors Identification Behavioral Characteristics Assessment Educational Programming and Trends and Issues Expertise Edited by two of the most accomplished scholars in special education chapter authors include a carefully chosen mixture of established and rising young stars in the field This book is an appropriate reference volume for anyone researchers scholars graduate students practitioners policy makers and parents interested in the state of special education today its research base current issues and practices and future trends It is also appropriate as a textbook for graduate level courses in special education *The School's Role in Educating Severely Handicapped Students* Barbara L. physiotherapy Assessment of Young Developmentally Disabled Children Theodore D. Wachs, Robert Sheehan, 1988-05-31

Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I-III This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests **Monthly Catalog of United States Government Publications** United States. Superintendent of Documents, 1985 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index *The Condition of Education*, *Early Intervention Studies for Young Children with Special Needs* David R. Mitchell, Roy Irwin Brown, 2013-12-14 This is the fourth volume in the Rehabilitation Education Series It is the first volume to be co edited and follows a volume on quality of life The first few years of a child's life sets the pattern for many issues associated with quality of life Although intervention may at later stages enhance quality of life it is in these first years that the attitudes and systems of society can have long lasting effects The early years are increasingly seen as the province of the educator and in children with disabilities special education They are already recognized as the province of the health professional Here we attempt to take a different line reinforcing the idea that child and family are the interacting system we serve The needs are often multidisciplinary but we need to recognize context as the critical marker Thus assessment needs to be linked to programmes and therefore programmes themselves have to be evaluated and environmental issues underlined In particular the contribution from those with sociological interests are noted Intervention whether it be psychological or educational is frequently and ideally placed in the hands of parents or the nearest caregiver The professional becomes the processor ever mindful of the context in which needs and goals are experienced These issues are basic to the issues of quality of life D R M R I B
