An Introduction to Education in the People's Republic of China and U.S.-China Educational Exchanges Thomas Fingar, Linda A. Reed, 1982

Chinese Student Migration and Selective Citizenship Lisong Liu, 2015-08-20 Since China began its open door and reform policies in 1978 more than three million Chinese students have migrated to study abroad and the United States has been their top destination The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigration out of China have aroused wide public and scholarly attention in both China and the US This book examines the four waves of Chinese student migration to the US since the late 1970s showing how they were shaped by the profound changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the

selective nature on both ends of the negotiations between nation states and migrants. It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization. This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community. Bridging the gap between Asian and Asian American studies, the book also integrates the studies of migration, education and international relations. Therefore, it will be of interest to students of these fields as well as Chinese history and Asian American history more generally.

American Study Programs in China Peggy Blumenthal, 1981 **China Exchange News**, 1983 **A Relationship Restored** The Committee on Scholarly Communication with the People's Republic of China, 1986-02-01. In what The Wall Street Journal calls the first comprehensive analysis of Sino American educational exchanges, this volume provides information on the numbers and attributes of American and Chinese students and scholars who have moved between China and the United States since 1978. This book not only supplies quantitative data on their fields of study, length of stay and financial resources but also discusses such qualitative issues as the problems students and scholars have encountered in carrying out their work, the adequacy of their preparation, the reabsorption process that students and scholars from China face upon their return home and the impact of the exchange process on fields of study in both countries.

Chinese Education Irving Epstein, 2017-12-12. This book, first published in 1991, is concerned with educational change. It seeks to place Chinese educational policies within the broader social context of Chinese development and modernisation imperatives by analysing issues germane to specific educational structures and sectors. At the same time, it attempts to inform the reader of larger policy issues which affect the educational system as a whole and speak to more global concerns: the nature of Chinese student activism, gender inequality, rural-urban disparities, educational inequality, the influences of market forces and the growth of professionalism.

China's Mongols at University Zhenzhou Zhao, Wing On Lee, 2010-04-09. Minority students in China often receive preferential treatment for access to universities. However, very little is known about minority student experiences and perceptions on campus after they are accorded what is called meaningful access to university. The Mongols emerged as a distinct ethnic group in China starting in the 11th century and in the centuries that followed, conquered a large part of the world. However, in modern times, this nomadic people's influence has declined and even their survival in China has been threatened. This decline is evidenced by the fact that increasing numbers of Mongols have abandoned their native language and traditional customs, especially those who live in cities. How do Mongol university students, who form the backbone of the Mongol intellectual community, identify themselves in a modern Chinese context? How do they react as university students to the way in which their culture is recognized and represented? Do Mongol students suffer from injustice in the cultural dimension of campus life? China's Mongols at University: Contesting Cultural Recognition seeks to answer these questions. Zhenzhou Zhao addresses these

issues by comparing the university discourse on minority culture policy institutional structure and daily life and the Mongol student discourse concerning their experiences perceptions of recognition and dedication to self representation on campus Additionally Gao compares three universities in China Located in Inner Mongolia Autonomous Region Beijing and Hubei Province respectively each of these universities represents one of three types of higher education accessible to minority students in China universities located in ethnic areas standard universities and universities for nationalities China s Mongols at University explores and discusses an intrinsic connection between marketization and globalization and the disadvantages faced by minority groups This book argues that China must move from a policy of preferential tre

Jimmy Carter famously responded Tell him to send 100 000 This was the launch of educational exchange as a core pillar of the U S China relationship Until the 40th anniversary of the normalization of U S China relations and U S China educational exchange in 2019 there was general agreement that the exchange of students and scholars benefited both countries There was recognition that the enormous increase in personal interaction and friendships and knowledge about each other s society culture economy and government strengthened understanding trust and cooperation At a time when U S China relations are at its lowest point since the normalization of relations the benefits of educational exchange are being questioned if not under assault Few could have predicted that Chinese students would be weaponized by both sides caught up in the political and security disputes between the two governments A trade war political tensions concerns about academic espionage and influence operations rising incidents of anti Asian hate and a global pandemic have created a perfect storm to stir up distrust as well as retaliatory measures that restrict student mobility on both sides of the Pacific After years of fast growth the number of Chinese students and researchers coming to the U S has slowed China is still the largest source of international students in the U S accounting for about one third of the total but America s appeal is weakening Is this shift toward declining numbers an overdue correction to better protect America against academic espionage and influence operations and prevent China from capitalizing on American know how to accelerate its own progress Or is this decline in numbers an unnecessary and damaging hit on American universities preeminent position in global higher education and its open science model leading to loss of U S competitiveness and international prestige This report more broadly is an attempt to discern the benefits risks and challenges of U S China educational exchange and determine how educational exchange can advance the interests of both the U S and China going forward
