Education Inequality And Social Identity:

Education, Inequality And Social Identity Lawrence B. Angus, 2005-07-28 The ethnographic studies in this volume explore issues and approaches in the study of education and inequality The authors identify that access to status knowledge and power in society and in particular in schools varies by virtue of individuals social and cultural identities The process of changing this system and resistance to change are examined in this collection in an attempt to find a course of action for those who are victims of inequality or who seek to combat inequality *Education, Inequality And Social Identity* Lawrence B. Angus, 2005-07-28 The ethnographic studies in this volume explore issues and approaches in the study of education and inequality The authors identify that access to status knowledge and power in society and in particular in schools varies by virtue of individuals social and cultural identities The process of changing this system and resistance to change are examined in this collection in an attempt to find a course of action for those who are victims of inequality or who seek to combat inequality *Education, Inequality and Social Class* Ron Thompson, 2019-02-25 *Education Inequality and Social Class* provides a comprehensive discussion of the empirical evidence for persistent inequality in educational attainment It explores the most important theoretical perspectives that have been developed to understand class based inequality and frame further research With clear explanations of essential concepts this book draws on empirical data from the UK and other countries to illustrate the nature and scale of inequalities according to social background discussing the interactions of class based inequalities with those according to race and gender The book relates aspects of inequality to the features of educational systems showing how policy choices impact on the life chances of children from different class backgrounds The relationship between education and social mobility is also explored using the concepts of social closure positionality and social congestion The book also provides detailed discussions of the work of Pierre Bourdieu and Basil Bernstein two important theorists whose contributions have generated thriving research traditions much used in contemporary educational research *Education Inequality and Social Class* will be essential reading for postgraduate and advanced undergraduate students engaged in the study of education childhood studies and sociology It will also be of great interest to academics researchers and teachers in training *Educational Inequalities* Kalwant Bhopal, Uvanney Maylor, 2013-11-07 While there is considerable literature on social inequality and education there is little recent work which explores notions of difference and diversity in relation to race class and gender This edited text aims to bring together researchers in the field of education located across many international contexts such as the UK Australia USA New Zealand and Europe Contributors investigate the ways in which dominant perspectives on difference intersectionality and institutional structures underpin and reinforce educational inequality in schools and higher education They emphasize the importance of international perspectives and innovative methodological approaches to examining these areas and seek to locate the dimensions of difference within recent theoretical discourses with an emphasis on race class and gender as key categories of analysis **The Social Psychology**

of Inequality Jolanda Jetten, Kim Peters, 2019-10-31 Economic inequality has been of considerable interest to academics, citizens, and politicians worldwide for the past decade and while economic inequality has attracted a considerable amount of research attention it is only more recently that researchers have considered that economic inequality may have broader societal implications. However, while there is an increasingly clear picture of the varied ways in which economic inequality harms the fabric of society, there is a relatively poor understanding of the social psychological processes that are at work in unequal societies. This edited book aims to build on this emerging area of research by bringing together researchers who are at the forefront of this development and who can therefore provide timely insight to academics and practitioners who are grappling with the impact of economic inequality. This book will address questions relating to perceptions of inequality, mechanisms underlying effects of inequality, various consequences of inequality, and the factors that contribute to the maintenance of inequality. The target audiences are students at advanced undergraduate or graduate level as well as scholars and professionals in the field. The book fills a niche of both applied and practical relevance, strongly emphasizing theory and integration of different perspectives in social psychology. Given the broad interest in inequality within the social sciences, the book will be accessible to sociologists and political scientists as well as social, organizational, and developmental psychologists. The insights brought together in *The Social Psychology of Inequality* will contribute to a broader understanding of the far-reaching costs of inequality for the social health of a society and its citizens. This edited volume brings together cutting-edge social psychological research addressing one of the most pressing issues of our times: economic inequality. Collectively, the chapters illuminate why inequality has negative effects on individuals and societies, when and for whom these negative effects are most likely to emerge, and the psychological mechanisms that maintain inequality. This comprehensive volume is an essential read for those interested in understanding and ameliorating inequality. Brenda Major, Distinguished Professor, Department of Psychological and Brain Sciences, University of California. This invaluable volume demonstrates the indispensable and powerful contribution that social psychologists can make to our understanding of societal inequality. For those outside of social psychology, it provides a unique and comprehensive overview of what social psychology has to offer, and for social psychologists, it is exemplary in demonstrating how to make a systematic contribution to the understanding of a hotly debated real-world issue. Scholars and students alike, and from various disciplines, will gain much from reading this fascinating and inspiring social psychological journey. Maykel Verkuyten, Professor in Interdisciplinary Social Science, University of Utrecht. *The Social Psychology of Inequality* offers a superb and timely social psychological analysis of the causes and consequences of increasing wealth and income gaps. With its refreshingly international authorship, this volume offers profound insights into the cognitive and social mechanisms that help maintain but potentially also to overcome an economy that is rigged in favor of the wealthy. A new and stimulating voice illustrating science in the service of a fairer and more democratic society. Anne Maass, Professor of Social Psychology, University of Padova. This volume assembles an

impressive list of leading international scholars to address a timely and important issue the causes and consequences of economic inequality The approach to the topic is social psychological but the editors and chapters make valuable connections to related literatures on socio structural influences in allied disciplines such as economics political science and sociology The Social Psychology of Inequality offers cutting edge insights into the psychological dynamics of inequality and novel synthesis of structural and individual level influences and outcomes of inequality It should attract a wide audience and will set the agenda for research on economic inequality well into the future John F Dovidio Carl Iver Hovland Professor of Psychology and Public Health Yale University **Reproduction of Inequality and Social Exclusion** Uddhab Pyakurel,2021-01-05

This book is a detailed account of how hierarchy has been maintained historically by the Nepali state affirming the uniqueness of a caste based social order by bringing outsiders especially ethnic groups and religious minorities into the caste fold Focusing on the contemporary state of Dalits the community that was and is put at the bottom of a very hierarchical social order in Nepal the author argues that the traditional caste based social order is still prevalent in the new Nepal even after the recent socio political and constitutional changes Illustrated by scientifically employed and interpreted data mainly in the three sectors of education politics and employment the book postulates that people who were and are born into the high caste still have more access to the resources and opportunities available in society in comparison with those born into the lower caste It further argues that although reservation policies are in place to address social exclusion these could not bring expected outcomes mainly due to the lack of engagement if not ignorance of both dominant groups and the community in the margin The absence of clarity among political actors on the positive discrimination and affirmative actions has contributed to backtracking the recently created space in line with inclusive Nepal *Schooling and Social Identity* Patrick Alexander,2020-01-30 This book examines the nature of age as an aspect of social identity and its relationship to experiences of formal education Providing a new and critical approach to debates about age and social identity the author explores why age remains such an important aspect of self making in contemporary society Through an ethnographic account of a secondary school in the south east of England the author poses three principal questions Why are schools in English organised according to age How do pupils and teachers learn to act their age while at school Ultimately why does age remain such an important and complex organising concept for modern society Cutting across lines of class and gender this timely book will be of interest to students and scholars of self making and identity in educational contexts and others interested in how schooling socialises young people into categories of age as the foundational building blocks of modern society
