

## Ways forward in higher education

**Adjust financing schemes for the poor to benefit.** Examine and tackle social determinants, such as income, that limit households to low-cost and low-quality higher education. Free tuition may help, but educational grants beyond tuition should also be prioritized to motivate the poorest household members to pursue higher education.

**Promote the complementary relationship between private and public school education.** Private and public schools both have something to offer. Harness their strengths to diversify options for pursuing education.

**Improve education inputs.** Promote voluntary accreditation. Encourage more HEIs to become recognized centers for excellence. Address low teacher qualifications.

**Develop a research culture and build a functional innovation system.** There must be enabling policies that encourage technological developments and network-building among HEIs. This system should also actively link students to the scientific community and market innovations.

**Learn from the pandemic.** Leverage technology to support learning. This includes ensuring availability, affordability, and meaningful access. Regularly produce and study granular data to uncover barriers to pursuing and implementing quality higher education.
