Business Research Projects A. D. Jankowicz, 2013-11-11 about management research has developed and made a more prominent appearance in the relevant literature Both the Academy of Management Review and Management Education and Development have devoted complete special issues to these topics in their impact on theory building and research see section 6 5 While the latter journal continues its editorial team have decamped to set up a new periodical Management Learning which emphasizes current thinking about management research This the New Paradigm postmodern analysis call it what you will is an epistemology whose relevance I argued in my first edition and continue to emphasize in Chapter 6 of the present The appreciation of qualitative approaches to the understanding of organizational life has increased during the last four years approaches seen as complementary to quantitative analysis by many a substitute by some The appearance of the second edition of Miles and Huberman 1994 indicates the growing importance attached to qualitative analysis by many management researchers and I have mentioned some of the techniques they advocate at relevant points in Part Three of this book without attempting or indeed being able to replicate their magnificent work Discourse analysis biography and hermeneutic analysis are among the recent approaches to which pointers are provided in Part Three Similarly the value of arguing a case rather than testing a thesis has been emphasized for some forms of Diploma and MBA work see section 6 4

Whitaker's Cumulative Book List ,1984
International Handbook on Geographical Education Rod Gerber,2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical

education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

Existential Crises in Educational Administration and Leadership Eugenie A. Samier, 2022-06-30 This book examines the theoretical foundations relevant to existential issues in educational leadership and management taking inspiration from Munch's painting *The Scream* The book considers internationally relevant topics such as the growth of neoliberalism globalisation cultural shifts forced migration and the digitalisation of the socio cultural sphere and uniquely positions these crises as existential threats rather than simply political cultural or social The volume explores this complex set of dimensions in existential experience and outlines the implications for research and teaching in educational leadership By exemplifying the narrative and introspective nature of existential research the book addresses major aspects of the field including the impact such threats have on organisational studies policy administrative structures and practices and leadership This timely collection on existential issues in administration and leadership will appeal to academics scholars researchers practitioners and policy makers It will also be of great interest for students in teacher education programmes and graduate courses in educational administration and leadership organisation studies and educational ethics for broad international use

Developing Student Autonomy in Learning David Boud, 2012-11-12 First Published in 1987 The assumption about the purpose of education to which the authors of this book subscribe is that it is to produce autonomous lifelong learners This book is about a very important goal of education and how it can be translated into practice It concerns ways in which teachers in higher education can enable students to become more autonomous in their learning that is assist students to learn more effectively without the constant presence or intervention of a teacher

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-16 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity

issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Working with Bereaved Children and Young People Brenda Mallon, 2010-10-20 This book offers a fresh insight into working practices with children and young people who are experiencing the death of a family member friend school peer or in their social network Bridging the gap between theory and practice the book s practical skills focus is informed by the latest research findings on children and young people s experience of grief The wide ranging content includes a comprehensive review of theoretical approaches to bereavement the impact of different types of grief on children working with children who have been bereaved in traumatic circumstances such as through criminal behaviour skills development The list of resources case studies and exercises encourage critical engagement with the counselling theory and promote reflexive practice Trainees in counselling psychotherapy and social work as well as teachers and mental health workers will find this an invaluable resource for working with this vulnerable client group

The Pixelated Prisoner Carolyn McKay, 2018-06-13 Technological linkages between justice and law enforcement agencies are radically altering criminal process and access to justice for prisoners Video links integral to an increasingly networked justice matrix enable the custodial appearance of prisoners in remote courts and are becoming the dominant form of court appearance for incarcerated defendants This book argues that the incorporation of such technologies into prisons is not without consequence technologies make a critical difference to prisoners experiences of criminal justice By focusing on the prison endpoint and engaging with the population most affected by video links the prisoners themselves this book interrogates the legal and conceptual shifts brought about by the technology s displacement of physical court appearance The central argument is that custodial appearance has created a heightened zone of demarcation between prisoners and courtroom participants This demarcation is explored through the transformed spatial corporeal and visual relationships The cumulative demarcations challenge procedural justice and profoundly recompose prisoners legal experiences in ways not necessarily recognised by policy makers
