The Technological Teacher Shane Hoon, 2008 We live in a world that is rapidly evolving through technology This evolution has led to a changing cultural ideology and how we function day to day The influences of technology have become ubiquitous in almost every aspect of our current society including in our educational systems As expectations have risen within our classrooms for both students as well as teachers we are seeing more and more educational technology being implemented into academia and at all levels The objective of this thesis is to critically investigate this technological shift in education and to understand what effects it is having on student learning but more importantly teaching practices The overarching questions that this thesis examines are How has the role of the teacher educator changed as a result of new educational technology What are some factors influencing teachers use of technology in the classroom Finally how do teachers generally feel about educational technology While initial research has offered a mixed bag of perspectives and attitudes the initial hypothesis for this project was that the teacher has become more of a facilitator of technology and that some of the art of teaching had been lost The purpose of this study was to investigate this change from the perspective of the teacher in order to better understand the benefits and potential consequences of educational technology The implementation of educational technology has been seen to have presented numerous benefits for many within the education system However what these technologies have also presented various challenges and unintended consequences Some of those challenges being accessibility cost effectiveness lack of support and technological know how credibility of resources and reliability of software and hardware to name a few It has also been recognized that the pressure on teachers to implement technology in the classroom has been heavily influenced by society the administration and institution itself and even through professional pressures from colleagues in the field as well as simply trying to stay up to date in order to remain effective What this has meant for teachers and students within the classroom is a shift in the approach to learning In order to better define the boundaries and limitations of this project only the state of Minnesota was studied Additionally research data was collected from current high school social studies and history teachers and educators as well as other professionals within the field from the state of Minnesota Primary fieldwork for this study was collected through a teacher survey personal interviews and classroom observations The results of the fieldwork demonstrated a greater overall enthusiasm for educational technology than anticipated Nevertheless teachers still expressed concern over what technologies are being introduced the degree to which they are incorporated and the practicality of these resources Technology may be enhancing the learning experience of discovering information in new and creative ways but it may also be unintentionally marginalizing our education system standards and the quality of our teachers Educational technology is a

double edged sword We must be careful with how we use it *Managing Educational Technology* Sandra Schamroth Abrams,Xiaojun Chen,Michael Downton,2018-03-05 *Managing Educational Technology* examines the ways in which stakeholders from businesses K 12 schools and universities can influence the quality and success of technology integration in primary and secondary classrooms Inspired by their experiences in the field as educators education researchers and technology evaluators the authors present vignettes that highlight the benefits demands and limitations often associated with the introduction and integration of educational technologies to K 12 school environments These examples also underscore the inherent nuances in partnerships among businesses K 12 schools and universities Readers can use these rich examples when considering ways to integrate products into schools as well as when discussing analyzing and evaluating the promises of and challenges in doing so End of chapter questions guide readers to consider alternate actions and identify steps for additional growth which complement the authors practical suggestions to strengthen business school university partnerships Any reader interested in educational technology educational leadership or business will benefit from this insightful investigation of business school university partnerships *Instructional Technology and Media for Learning* Sharon E. Smaldino,Deborah L. Lowther,Clif Mims,James D. Russell,2019 Specific realistic strategies for integrating technology and media into the PK 12 classroom Using the ASSURE lesson plan model *Instructional Technology and Media for Learning* 12th Edition demonstrates how to implement a complete range of technology and media formats that can be used to support and enhance teaching and learning Written from the viewpoint of the teacher the text highlights everyday teaching challenges and shows educators practical solutions for incorporating technology and media into their classroom Examples are drawn from elementary and secondary education covering a wide range of content areas The 12th Edition keeps readers up to date with recent innovations in technology and media including mobile Web 2 0 social media copyright issues coding as literacy transdisciplinary learning artificial intelligence and augmented reality Expanded and revised discussions help teachers consider appropriate technology that aligns with content standards while meeting the learning needs of all students *Instructional Technology and Media for Learning* 12th Edition is also available via Revel TM an interactive learning environment that enables students to read practice and study in one continuous experience Learn more about Revel **The Use of Instructional Technology in Schools** Mal Lee,Arthur Winzenried,2009 *The Use of Instructional Technology in Schools* examines teachers use of the major instructional technologies over the last century from the days of silent film radio and slide shows through to the modern interactive whiteboard and the Internet It explores the reasons why so few teachers have used these technologies and why even in today s digital world the most commonly used classroom tools are the pen paper and teaching board The book provides education decision makers with an invaluable insight into the million dollar question What is required to get all teachers across the nation using the appropriate instructional technology as a normal part of everyday teaching Without question student learning is enhanced by adopting these new technologies Until now

research on why the majority of teachers use only the most basic tools in the classroom has been scarce The Use of Instructional Technology in Schools examines this phenomenon and most importantly identifies what is required to achieve teachers universal acceptance of instructional technologies **Computer Education for Teachers** Vicki F. Sharp,2005 Designed to meet the needs of the student unfamiliar with the use of the computer in the classroom this text is written for undergraduate and graduate education students who want an up to date readable practical and concise introduction to computers for teachers Included in the text are a wealth of classroom lessons that integrate technology into the classroom
