Designing for Digital Reading Jennifer Pearson,George Buchanan,Harold Thimbleby,2022-05-31 Reading is a complex human activity that has evolved and co evolved with technology over thousands of years Mass printing in the fifteenth century firmly established what we know as the modern book with its physical format of covers and paper pages and now standard features such as page numbers footnotes and diagrams Today electronic documents are enabling paperless reading supported by eReading technologies such as Kindles and Nooks yet a high proportion of users still opt to print on paper before reading This persistent habit of printing to read is one sign of the shortcomings of digital documents although the popularity of eReaders is one sign of the shortcomings of paper How do we get the best of both worlds The physical properties of paper for example it is light thin and flexible contribute to the ease with which physical documents are manipulated but these properties have a completely different set of affordances to their digital equivalents Paper can be folded ripped or scribbled on almost subconsciously activities that require significant cognitive attention in their digital form if they are even possible The nearly subliminal interaction that comes from years of learned behavior with paper has been described as lightweight interaction which is achieved when a person actively reads an article in a way that is so easy and unselfconscious that they are not apt to remember their actions later Reading is now in a period of rapid change and digital text is fast becoming the predominant mode of reading As a society we are merely at the start of the journey of designing truly effective tools for handling digital text This book investigates the advantages of paper how the affordances of paper can be realized in digital form and what forms best support lightweight interaction for active reading To understand how to design for the future we review the ways reading technology and reader behavior have both changed and remained constant over hundreds of years We explore the reasoning behind reader behavior and introduce and evaluate several user interface designs that implement these lightweight properties familiar from our everyday use of paper We start by looking back reviewing the development of reading technology and the progress of research on reading over many years Drawing key concepts from this review we

move forward to develop and test methods for creating new and more effective interactions for supporting digital reading Finally we lay down a set of lightweight attributes which can be used as evidence based guidelines to improve the usability of future digital reading technologies By the end of this book then we hope you will be equipped to critique the present state of digital reading and to better design and evaluate new interaction styles and technologies

*Print and Electronic Text Convergence* Bill Cope, Diana Kalantzis, 2001 With the progressive digitisation of the book production processes we see the emergence of a potentially potent mix of new technologies Not potent because these technologies are capable of driving change alone but potent for the commercial and cultural drivers which may work in concert with new technologies to transform the world of books and reading Central to these technological developments is the convergence of the technologies of eText and digital print This book examines recent technological changes in book production Our focus is in part on technological actuality centred mostly on the digitisation of text and its consequences Our focus is also on the realm of possibility Where might these technological shifts lead us What are the commercial and cultural

conditions under which technological possibility might bear fruits Within this volume we look specifically at the changing definition of a book A book is no longer a tangible thing a book is what a book does It is information architecture We examine the various manifestations of electronic book readers and imminent technologies such as electronic ink including case study on the use of ebook reading devices by a lending library and speculate about other uses of such devices We see the convergence of print and etext manifestations of the same thing electronically stored text with the difference demonstrated only in the shift in mindset necessary to accommodate emergent forms of digital text as information services within a product service system the changing shape of digital design and changes in printing technologies from letterpress to the rise of digital printing
