**The Handbook of Rhetoric and Public Address** Shawn J. Parry-Giles,J. Michael Hogan,2010-05-10 The Handbook of Rhetoric and Public Address is a state of the art companion to the field that showcases both the historical traditions and the future possibilities for public address scholarship in the twenty first century Focuses on public address as both a subject matter and a critical perspective Mindful of the connections between the study of public address and the history of ideas Provides an historical overview of public address research and pedagogy as well as a reassessment of contemporary public address scholarship by those most engaged in its practice Includes in depth discussions of basic issues and controversies public address scholarship Explores the relationship between the study of public address and contemporary issues of civic engagement and democratic citizenship Reflects the diversity of views among public address scholars advancing on going discussions and debates over the goals and character of rhetorical scholarship     **Voice, Text, Hypertext** Raimonda Modiano,Leroy F. Searle,Peter L. Shillingsburg,2016-06-01 Voice Text Hypertext illustrates brilliantly why interest in textual studies has grown so dramatically in recent years For the distinguished authors of these essays a text is more than a document or material object It is a cultural event a matrix of decisions an intricate cultural practice that may focus on religious traditions modern underground literary movements poetic invention or the irreducible complexity of cultural politics Drawing from classical Roman and Indian to modern European traditions the volume makes clear that to study a text is to study a culture It also demonstrates the essential importance of heightened textual awareness for contemporary cultural studies and critical theory and indeed for any discipline that studies human culture     **The Routledge Handbook of English Language and Digital Humanities** Svenja Adolphs,Dawn Knight,2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other

disciplines It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities Divided into three sections this handbook covers sources and corpora analytical approaches English language at the interface with other areas of research in the digital humanities In covering these areas more traditional approaches and methodologies in the humanities are recast and research challenges are re framed through the lens of the digital The essays in this volume highlight the opportunities for new questions to be asked and long standing questions to be reconsidered when drawing on the digital in humanities research This is a ground breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities *Handbook of Categorization in Cognitive Science* Henri Cohen,Claire Lefebvre,2005-10-25 Categorization the basic cognitive process of arranging objects into categories is a fundamental process in human and machine intelligence and is central to investigations and research in cognitive science Until now categorization has been approached from singular disciplinary perspectives with little overlap or communication between the disciplines involved Linguistics Psychology Philosophy Neuroscience Computer Science Cognitive Anthropology Henri Cohen and Claire Lefebvre have gathered together a stellar collection of contributors in this unique ambitious attempt to bring together converging disciplinary and conceptual perspectives on this topic Categorization is a key concept across the range of cognitive sciences including linguistics and philosophy yet hitherto it has been hard to find accounts that go beyond the concerns of one or two individual disciplines The Handbook of Categorization in Cognitive Science provides just the sort of interdisciplinary approach that is necessary to synthesize knowledge from the different fields and provide the basis for future innovation Professor Bernard Comrie Department of Linguistics Max Planck Institute for Evolutionary Anthropology Germany Anyone concerned with language semantics or categorization will want to have this encyclopedic collection Professor Eleanor Rosch Dept of Psychology University of California Berkeley USA **The Use of Modal Expression Preference as a Marker of Style and Attribution** Elizabeth Bell Canon,2010 Can an author s preference for expressing modality be quantified and then used as a marker of attribution This book explores the possibility of using the subjunctive mood as an indicator of style and a marker of authorship in Early Modern English texts Using three works by the sixteenth century biblical translator and polemicist William Tyndale Elizabeth Bell Canon establishes a predictable preference for certain types of modal expression The theory of subjunctive use as a marker of attribution was then tested on the anonymous 1533 English translation of Erasmus Enchiridion Militis Christiani Also included in this book is a modern English spelling version Tyndale s The Parable of the Wicked Mammon *Textual Awareness* Dirk Van Hulle,2009-12-14 Aware of the act of writing as a temporal process many modernist authors preserved numerous manuscripts of their works which themselves thematized time Textual Awareness analyzes the writing processes in James Joyce s Finnegans Wake Marcel Proust s la recherche du temps perdu and Thomas Mann s Doktor Faustus and relates these to Anglo American French and German theories of text By relating

theory to practice this comparative study reveals the links between literary and textual criticism A key issue in both textual criticism and the so called crisis of the novel is the tension between the finished and the unfinished After a theoretical examination of the relationship between genetic and textual criticism Dirk Van Hulle uses the three case studies to show how at each stage in the writing process the text still had the potential of becoming something entirely different how and why these geneses proceeded the way they did how Joyce Proust and Mann allowed contingencies to shape their work how these authors recycled the words of their critics in order to inoculate their works against them how they shaped an intertextual dimension through the processing of source texts and reading notes and how text continually generated more text Van Hulle s exploration of process sheds new light on the remarkable fact that so many modernist authors protected their manuscripts implying both the authors urge to grasp everything and their awareness of the dangers of their encyclopedic projects Textual Awareness offers new insights into the artificiality of the artifact the novel that are relevant to the study of literary modernism in general and the study of James Joyce Marcel Proust and Thomas Mann in particular Dirk Van Hulle is Assistant Professor of English and German Literature University of Antwerp **The Phraseology of Administrative French** Wendy J. Anderson,2006 The French administrative language of the European Union is an emerging discourse it is only fifty years old and has its origins in the French administrative register of the middle of the twentieth century but it is also a unique contact situation in which translation has always played a pivotal role Using the methodology of corpus linguistics and a specially compiled corpus of texts covering a range of genres this book describes the current discourse of EU French from the perspective of phraseology and collocational patterning and in particular in comparison with its French national counterpart Corpus methodology and an inclusive notion of phraseology embracing typical formulae locutions and patterning around keywords reveal subtleties and patterns which otherwise remain hidden and point to a discourse of EU French whose novel context of production has led it to be phraseologically conservative compared with the administrative French of France

*Computation and the Humanities* Julianne Nyhan,Andrew Flinn,2016-11-23 This book addresses the application of computing to cultural heritage and the discipline of Digital Humanities that formed around it Digital Humanities research is transforming how the Human record can be transmitted shaped understood questioned and imagined and it has been ongoing for more than 70 years However we have no comprehensive histories of its research trajectory or its disciplinary development The authors make a first contribution towards remedying this by uncovering documenting and analysing a number of the social intellectual and creative processes that helped to shape this research from the 1950s until the present day By taking an oral history approach this book explores questions like among others researchers earliest memories of encountering computers and the factors that subsequently prompted them to use the computer in Humanities research Computation and the Humanities will be an essential read for cultural and computing historians digital humanists and those interested in developments like the digitisation of cultural heritage and artefacts This book is open access under a CC BY NC

2 5 license **Historical Corpora** Jost Gehrke, Ralf Gippert,2015-03-01 The volume contains 23 papers read at the international conference Historical Corpora 2012 which was hosted by the LOEWE Research Cluster Digital Humanities of the State of Hesse at the University of Frankfurt on December 6 8 2012 The papers which include three keynote speeches have been duly updated for the present volume The contributions take a broad variety of perspectives on historical corpora including their structuring their management and various other facets In addition to this they cover a large amount of different languages extending from German in nearly all its historical facettes across the Romance languages into the Caucasus and from the recent past down into antiquity Differences also concern the linguistic interests prevailing in the papers which may focus on syntactic semantic pragmatic lexicological or other phenomena Overwhelmed Maurice S. Lee,2019-09-10 As Lee shows in Overwhelmed the rapid expansion of print created new relationships between literature and information He presents a new argument rather than being at odds as generations of critics have viewed them literature and information in the 19th century were entangled in surprisingly collaborative ways **Database Computing for Scholarly Research** Sandra R. Schloen,Miller C. Prosser,2023-12-23 This book discusses in detail a series of examples drawn from scholarly projects that use the OCHRE database platform Online Cultural and Historical Research Environment These case studies illustrate the wide range of data that can be managed with this platform and the wide variety of problems solved by OCHRE s item based graph data model The unique features and design principles of the OCHRE platform are explained and justified helping readers to imagine how the system could be used for their own data Data generated by studies in the humanities and social sciences is often semi structured fragmented highly variable and subject to many interpretations making it difficult to represent adequately in a conventional database The authors examine commonly used methods of data management in the humanities and offer a compelling argument for a different approach that takes advantage of powerful computational techniques for organizing scholarly information This book is achallenge to scholars in the humanities and social sciences asking them to expect more from technology as they pursue their research goals Written jointly by a software engineer and a research scholar each with many years of experience in applying database methods to diverse kinds of scholarly data it shows how scholars can make the most of their existing data while going beyond the limitations of commonly used software tools to represent their objects of study in a more accurate nuanced and flexible way Property, Land, Revenue, and Policy J. Albert Rorabacher,2016-09-13 For the first century and a half of its nearly 275 year existence the English East India Company remained ostensibly a mercantile enterprise satisfied to simply trade competing with other European traders In the middle of the eighteenth century as a response to French expansion in India the East India Company redefined itself becoming an active participant in India s game of thrones Through the use of its military might only tentatively supported by the English Crown and Parliament the Company dominated trade became a king maker and ultimately a colonial administrator over much of the Indian Subcontinent The Company had become a state in the guise of a

merchant The Company consolidated its position in Bengal then began to exert its power by toppling local potentates and absorbing one princely state after another Confronted with a land system that was built on custom and tradition and not law with no tradition of land ownership the British were forced to formulate a new land tenure and revenue system for India one based on British principles of property Permanent Settlement was the new government s first attempt at creating a new revenue system Through its creation for the first time private property rights were conferred on the formerly non landowning zamindars Which as this authoritative volume notes in turn created a land market destabilizing the political and social structure of India irretrievably **Language Learner Narrative** Helen O'Sullivan,2014-01-02 Increasing numbers of people have contact with other cultures and languages Language Learner Narrative examines representations of this phenomenon in literary texts using an applied linguistic approach This analysis of written narratives of language learning and cross cultural encounter complements objective studies in intercultural communication and second language acquisition research Kant s use of the term M ndigkeit in his essay What is Enlightenment is used to frame the complex issues of language identity meaning and reality presented by the texts Augmented by Pierre Bourdieu s concept of linguistic capital this framing forms a counterpoint to the positioning of these authors as avatar s of poststructuralist wisdom Eva Hoffman The work includes a uniquely detailed linguistic analysis of Emine Sevgi zdamar s Mutter Zunge and further texts by other widely studied and less familiar authors Yoko Tawada Eva Hoffman Vassilis Alexakis Z Do Rock It also lists literary sources of language learner narrative Through its fundamental examination of what and how language means to us as individuals this volume will be of wide appeal to students and researchers in applied linguistics second language acquisition intercultural communication and literary studies **The Big Humanities** Richard Lane,2016-11-25 This book provides an accessible introduction to and overview of the digital humanities one of the fastest growing areas of literary studies Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place the digital laboratory The book provides a brief history of DH explores and explains the methodologies of past and current DH projects and offers resources such as detailed case studies and bibliographies Further the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences as well as convergences with other fast growing research spaces namely innovation labs fabrication labs maker spaces digital media labs and change labs The volume highlights the profound transformation of literary studies that is underway one in which the adoption of powerful technology and concomitantly being situated within a laboratory environment is leading to an important re engagement in the arts and humanities and a renewed understanding of literary studies in the digital age as well as a return to large scale financial investment in humanistic research It will be useful to students and teachers as well as administrators and managers in charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities Combining useful detail and an overview of the field the book will offers

accessible entry into this rapidly growing field
