Electronnucleus Scattering Workshop:

Electron-nucleus Scattering - Proceedings Of The Workshop Adelchi Fabrocini, Omar Benhar, Rocco

Schiavilla, 1994-03-30 The workshop aimed to gather the electron scattering community to assess the present status of the experimental and theoretical research program at the electron scattering facilities that will be available in the near future. The topics discussed include nucleon form factors and deep inelastic structure functions, electroproduction of nucleon resonances, final state interactions and nucleon-nucleon correlations in nuclei, electron-nucleon scattering with polarized beams and targets, and nuclear transparency. *Challenges Of Nuclear Structure, Procs Of The 7th Intl Spring Seminar On*

Okuno, 2000-10-20 In recent years the main research areas were photonuclear reactions and meson productions by using the first high duty tagged photon beam and the TAGX spectrometer Although this field is developing quite rapidly the synchrotron was closed in 1999 after 37 years of operation and these activities continue at new facilities It was therefore a good time to discuss the present status and future directions of this field at this occasion The Symposium was attended by 85

physicists and 35 talks were presented This book contains the papers presented in the scientific program of the Symposium aspects of kaon photoproduction *Proceedings of the Second LAMPF II Workshop*, 1983 Low Energy Neutrino-Nucleus Interactions at the Spallation Neutron Source Samuel Hedges, 2024-10-18 This thesis highlights the development and analysis of multiple neutrino detectors deployed to the Spallation Neutron Source SNS at Oak Ridge National Laboratory as part of the COHERENT experiment It includes a preliminary measurement of the neutrino induced neutron cross section on lead and analysis that led to the first inclusive electron neutrino charged current measurement on iodine These results add to the small number of inelastic neutrino nucleus cross sections measured in this energy range which are useful for understanding supernova and solar neutrino detection sensitivity Additionally it discusses preliminary work for and design of COHERENT's ton scale NaI coherent elastic neutrino nucleus scattering CEvNS detector currently being deployed to the SNS Finally it includes information on a campaign to measure the nuclear recoil quenching factor of NaI using multiple crystals attempting to resolve inconsistencies with existing measurements **Proceedings of the Workshop on Electronuclear Physics with Internal Targets** Raymond George Arnold, R. Tomusiak, Henry S. Caplan, Edward T. Dressler, 2013-11-11 The NATO Advanced Study Institute New Vistas in Electro Nuclear Physics was held in Banff Alberta Canada from August 22 to September 4 1985 This volume contains the lecture notes from that Institute The idea to organize this Institute coincided with the award of funding for a pulse stretcher ring at the University of Saskatchewan's Linear

Accelerator Laboratory This together with the high level of interest in electron accelerators worldwide convinced us that it was an appropriate time to discuss the physics to be learned with such machines In particular that physics which requires high energy and or high duty cycle accelerators for its extraction was intended to be the focus of the Institute Thus the scope of the lectures was wide with topics ranging from the structure of the trinucleons to quark models of nucleons QCD and QHD The theme however was that we are just trying to understand the nucleus and that the electromagnetic probe can serve as a powerful tool in such a quest
