33. There are currently over 40 companies (excluding office equipment dealers) marketing reprographic equipment. According to Rank Xerox the number of companies marketing machines using the major reprographic processes in mid 1975 were:

<i>Process</i>	<i>Number of companies marketing machines incorporating the process</i>
(a) Electrostatic: Indirect electrostatic	13
Direct electrostatic/dual spectrum	29
(b) Spirit	6
(c) Stencil	8
(d) Offset lithograph	11

Several of the 40 companies mentioned above marketed machines using different processes. Many of these companies have no manufacturing facilities in the United Kingdom but are marketing subsidiaries of overseas companies. Indeed a feature of the reprographic industry is that almost all the suppliers are multinational companies. Most suppliers market a range of products in the office equipment field and almost all offer reprographic equipment incorporating more than one of the several reprographic processes. Rank Xerox is an exception since the copiers it supplies use only the indirect electrostatic process. Another feature of the reprographic equipment industry is the many links between apparently independent suppliers. Thus companies have come together to pool technical or marketing resources and to set up joint ventures and there is a host of distribution, marketing, patent and know-how licensing agreements between different companies.

34. The four largest companies supplying the offset market are Addressograph-Multigraph, Rotaprint, Gestetner, and A B Dick. Hybrid offset/electrostatic installations are marketed by Addressograph-Multigraph, Rotaprint and A B Dick among others.

35. The major supplier of stencil duplicators is Gestetner and most of the rest of the supply is accounted for by Roneo Vickers, Omal and Ofrex, through its subsidiary Ellam. Ofrex and Nig Banda share 90 per cent of the United Kingdom market for spirit duplicators with Rex Rotary and Roneo Vickers accounting for most of the remainder.
