Elements Of Language Third Course Assessment Alternatives:

Classroom-based Assessment in L2 Contexts Dina Tsagari, 2016-06-22 This edited volume addresses issues that promote the notion of Classroom based Language Assessment CBLA for the academic community and beyond The book explores recent thinking and research on CBLA within the fields of language testing assessment and general education based on theoretical and research papers presented at the recent CBLA SIG EALTA Symposia held in Cyprus and the pre conference EALTA workshops in various countries around Europe The volume contains 17 chapters which involve both high stakes tests and classroom based assessments conducted by academics professionals and researchers in the field It brings together high quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention Overall this edited collection with its international scope offers a ground breaking resource bringing together in balanced relationship the fields of education and second language testing and assessment

Ideas and Options in English for Specific Purposes Helen Basturkmen, 2014-03-14 This volume presents a range of views about language learning and teaching in English for Specific Purposes ESP Its purpose is to go beyond individual cases and practices to examine the approaches and ideas on which they are based The aim is for readers to adopt an analytical stance toward the field and to identify current perspectives in ESP and the ideas driving them *Ideas and Options in English for Specific Purposes* does not promote any one approach but rather identifies and illustrates those in evidence today The main emphasis is on the links between theory and ESP teaching and research Ideas from linguistics sociolinguistics education SLA and social theories are described Links are then made between these ideas and ESP course designs instructional materials and research projects Thus the book moves back and forth between descriptions of theories teaching practice and research Part I introduces the book s approach to description of ESP and the framework used to investigate it Part II examines ideas of language learning and teaching in ESP Recognizing that ESP is taught in many different countries and contexts the author draws on a wide range of examples of teaching practice and research from around the world and from different branches of ESP including English for Academic Purposes English for Professional Purposes and English for Vocational Purposes From Chapter 3 onward each chapter includes Questions for Discussion and Projects to encourage readers to research and analyze the practices of ESP in their own contexts and to consider the ideas they draw on in their own teaching This text is geared toward graduate level TESOL education courses

Protocol Engineering Hartmut König, 2012-10-09 Communication protocols form the operational basis of computer networks and telecommunication systems They are behavior conventions that describe how communication systems interact with each other defining the temporal order of the interactions and the formats of the data units exchanged essentially they determine the efficiency and reliability of computer networks Protocol Engineering is an important discipline covering the design validation and implementation of communication protocols Part I of this book is devoted to the fundamentals of communication protocols describing their working principles and implicitly also those of computer networks

The author introduces the concepts of service protocol layer and layered architecture and introduces the main elements required in the description of protocols using a model language. He then presents the most important protocol functions. Part II deals with the description of communication protocols offering an overview of the various formal methods, the essence of Protocol Engineering. The author introduces the fundamental description methods such as finite state machines, Petri nets, process calculi and temporal logics that are in part used as semantic models for formal description techniques. He then introduces one representative technique for each of the main description approaches among others SDL and LOTOS and surveys the use of UML for describing protocols. Part III covers the protocol life cycle and the most important development stages presenting the reader with approaches for systematic protocol design with various verification methods with the main implementation techniques and with strategies for their testing in particular with conformance and interoperability tests and the test description language TTCN. The author uses the simple data transfer example protocol XDT (eXample Data Transfer) throughout the book as a reference protocol to exemplify the various description techniques and to demonstrate important validation and implementation approaches. The book is an introduction to communication protocols and their development for undergraduate and graduate students of computer science and communication technology and it is also a suitable reference for engineers and programmers. Most chapters contain exercises and the author's accompanying website provides further online material including a complete formal description of the XDT protocol and an animated simulation visualizing its behavior.

Portfolio Assessment for the Teaching and Learning of Writing Ricky Lam, 2018-06-26 This book provides teachers, instructors, scholars and administrators with a practical guide to implement portfolio assessment of writing in their work contexts. Unlike most existing volumes which underscore theory building, it describes and discusses several key issues concerning how portfolio assessment can be carried out in authentic classrooms with a focus on its processes, reflective components, task types and design, scoring methods and actionable recommendations.
