The Mind's Provisions Vincent Descombes, 2021-08-10 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the

mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as L vi Strauss s work on the symbolic status of myths He identifies as incoherent both the belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind s collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France s finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology psychology critical theory and French studies

Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B C when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them

The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls into it 1 My apology to Prof Henle at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course
