Electronic Information Display Technologies Terence J Nelson, John R Wullert II, 1997-02-20 This book is a comprehensive review of the present state and future prospects of the displays used in entertainment television sets and in data terminals and personal computers Such a treatment was deemed necessary because of the importance of displays in possible future communications services incorporating computer graphics and video A few main conclusions are drawn One is that modest sized flat panel displays will become commonplace where space is at a premium such as on desktops and in kitchens or bedrooms It is another matter to stretch these displays to several feet on a side however For the next five to ten years these larger displays will mostly rely on optical projection Thereafter plasma techniques could well make large area flat panel TV displays affordable
