Vieux,2013-03-14 During ten years serving with the USDA Soil Conservation Service SCS now known as the Natural Resources Conservation Service NRCS I became amazed at how millions of dollars in contract monies were spent based on simplistic hydrologic models As project engineer in western Kansas I was responsible for building flood control dams authorized under Public Law 566 in the Wet Walnut River watershed This watershed is within the Arkansas Red River basin as is the Illinois River basin referred to extensively in this book After building nearly 18 of these structures I became Assistant State Engineer in Michigan and for a short time State Engineer for NRCS Again we based our entire design and construction program on simplified relationships variously referred to as the SCS method I recall announcing that I was going to pursue a doctoral degree and develop a new hydrologic model One of my agency s chief engineers remarked Oh no not another model Since then I hope that I have not built just another model but have significantly advanced the state of hydrologic modeling for both researchers and practitioners Using distributed hydrologic techniques described in this book I also hope one day to forecast the response of the dams I built **Handbook of Applied Hydrology**,
